

1. Record Nr.	UNINA9911019149003321
Autore	Zhou Li
Titolo	Supercritical Adsorption for Cleaner Energy and the Environment
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2025 ©2025
ISBN	9783527851676 3527851674 9783527851652 3527851658 9783527851645 352785164X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (257 pages)
Disciplina	660.284235
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Comprehensive and technically detailed approach to addressing environmental and energy challenges through the advance of adsorption theory and techniques Supercritical Adsorption for Cleaner Energy and the Environment delves into the novel theory of supercritical adsorption and its practical applications in energy and environmental management.
