

1. Record Nr.	UNINA9911019198803321
Autore	Zhou Boyang
Titolo	Communication Networks in Smart Power Grids
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2025 ©2025
ISBN	9781394285105 1394285108 9781394285129 1394285124 9781394285112 1394285116
Edizione	[1st ed.]
Descrizione fisica	1 online resource (418 pages)
Soggetti	Smart power grids - Communication systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"The power inverters can convert between DC and AC, which is useful for ultra-high-voltage (1000 kV) and extra-high-voltage (330-750 kV) power grids, and interconnections with renewable energy sources like solar panels. The power transducer measures electrical quantities such as voltage, current, and frequency, providing real-time data that allows control systems to assess the grid's health and performance."-- Provided by publisher.
