

1. Record Nr.	UNINA9911019275603321
Titolo	Cigarette smoke toxicity : linking individual chemicals to human diseases / / edited by David Bernhard
Pubbl/distr/stampa	Weinheim, : Wiley-VCH, 2011
ISBN	9786613140876 9781283140874 128314087X 9783527635337 3527635335 9783527635344 3527635343 9783527635320 3527635327
Descrizione fisica	1 online resource (389 p.)
Altri autori (Persone)	BernhardDavid
Disciplina	615.9523952 616.865071
Soggetti	Cigarette smoke - Toxicology Tobacco use - Health aspects Tobacco - Physiological effect
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Cigarette smoking -- pt. 2. Linking cigarette smoke chemicals to human diseases and pathophysiology -- pt. 3. Prevention and treatment of smoking-induced diseases -- pt. 4. Summary.
Sommario/riassunto	Smoking causes and contributes to a large number of human diseases, yet due to the large number of potentially hazardous compounds in cigarette smoke -- almost 5,000 chemicals have been identified, establishing the link between smoking and disease has often proved difficult. This unbiased and scientifically accurate overview of current knowledge begins with an overview of the chemical constituents in cigarette smoke, their fate in the human body, and their documented toxic effects on various cells and tissues. Recent results detailing the

many ways components of cigarette smoke adversely a
