

1. Record Nr.	UNINA9911019297903321
Titolo	Dynamics of environmental bioprocesses : modelling and simulation / / Jonathan B. Snape ... [et al.]
Pubbl/distr/stampa	Weinheim ; ; New York, : VCH, c1995
ISBN	9786611758646 9781281758644 1281758647 9783527615391 3527615393 9783527615384 3527615385
Descrizione fisica	1 online resource (524 p.)
Altri autori (Persone)	SnapeJonathan B
Disciplina	628.168015118 628.5/01/5118 628.5015118
Soggetti	Bioremediation - Mathematical models Water - Pollution - Mathematical models Bioremediation - Computer simulation Water - Pollution - Computer simulation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Dynamics of Environmental Bioprocesses; Preface; Organisation of the Book; ISIM Simulation Software; Acknowledgements; Table of Contents; Nomenclature for Chapters 1 and 2; 1 Modelling Principles; 1.1 The Role of Modelling in Environmental Technology; 1.2 General Aspects of the Modelling Approach; 1.3 Model Classification; 1.3.1 Deterministic Models; 1.3.2 Stochastic Models; 1.3.3 Steady-State Models; 1.3.4 Dynamic Models; 1.4 General Modelling Procedure; 1.5 Simulation Tools; 1.6 ISIM; 1.7 Introductory ISIM Example: WASTE; 1.8 Formulation of Dynamic Balance Equations 1.8.1 Mass Balance Procedures1.8.1.1 Case A . Continuous Stirred-Tank Reactor; 1.8.1.2 Case B . Tubular Reactor; 1.8.1.3 Case C . River

with Eddy Current; 1.8.1.4 Rate of Accumulation Term; 1.8.1.5 Convective Flow Terms; 1.8.1.6 Production Rate; 1.8.1.7 Diffusion of Components; 1.8.1.8 Interphase Transport; 1.8.1.9 Case A . Waste Holding Tank: Total and Component Mass Balance Example; 1.8.1.10 Case B . The Plug-Flow Tubular Reactor; 1.8.1.11 Case C . Biological Hazard Room; 1.8.1.12 Case D . Lake Pollution Problem; 1.8.2 Energy Balancing

1.8.2.1 Case A . Determining Heat Transfer Area or Cooling Water Temperature

1.8.2.2 Case B . Heating of a Filling Tank; 1.9 Chemical and Biological Reaction Systems; 1.9.1 Modes of Reactor Operation;

1.9.1.1 Batch Reactors; 1.9.1.2 Semi-Continuous or Fed-Batch

Operation; 1.9.1.3 Continuous Operation; 1.9.2 Reaction Kinetics;

1.9.2.1 Chemical Kinetics; 1.9.2.2 Biological Reaction Kinetics; 1.9.2.3

Simple Microbial Growth Kinetics; 1.9.2.4 Substrate Uptake Kinetics;

1.9.2.5 Substrate Inhibition of Growth; 1.9.2.6 Additional Forms of

Inhibition; 1.9.2.7 Other Expressions for Specific Growth Rate

1.9.2.8 Multiple-Substrate Kinetics 1.9.2.9 Structured Kinetic Models;

1.9.2.10 Interacting Micro-Organisms; 1.10 Modelling of Bioreactor

Systems; 1.10.1 Stirred Tank Reactors; 1.10.2 Modelling Tubular Plug-

Flow Reactor Behaviour; 1.10.2.1 Steady-State Balancing; 1.10.2.2

Unsteady-State Balancing; 1.11 Mass Transfer Theory; 1.11.1 Phase

Equilibria; 1.11.2 Interphase Mass Transfer; 1.11.2.1 Case A . Steady-

State Tubular and Column Modelling; 1.11.3 Case Studies; 1.11.3.1

Case A . Aeration of a Tank of Water; 1.11.3.2 Case B . Biological

Oxidation in an Aerated Tank

1.11.3.3 Case C . Determination of Biological Oxygen Uptake Rates by a

Dynamic Method 1.11.4 Gas-Liquid Phase Transfer Across a Free

Surface; 1.12 Diffusion and Biological Reaction in Solid Phase

Biosystems; 1.12.1 External Mass Transfer; 1.12.2 Finite Difference

Model for Internal Transfer; 1.12.3 Case Studies for Diffusion with

Biological Reaction; 1.12.3.1 Case A . Estimation of Oxygen Diffusion

Effects in a Biofilm; 1.12.3.2 Case B . Biofilm Nitrification; 1.13 Process

Control; 1.14 Optimisation. Parameter Estimation and Sensitivity

Analysis

1.14.1 Case A . Estimation of Bioreaction Kinetic Parameters for Batch

Degradation Using ESL and SIMUSOLV

Sommario/riassunto

Dynamic environmental processes are complex; the easiest and most effective way to understanding them lies through the disciplines of dynamic modelling and computer simulation. The prerequisite modelling fundamentals are presented in the first chapter in a manner comprehensible to students as well as to practising scientists and engineers. The second chapter describes the many environmental processes that lend themselves to modelling, for example pollution and wastewater treatment. The third part of the book provides 65 simulation examples both on the page and on an accompanying diskett
