

1. Record Nr.	UNINA9911019314603321
Titolo	Iminosugars as glycosidase inhibitors : Nojirimycin and beyond
Pubbl/distr/stampa	[Place of publication not identified], : Wiley VCH, 1999
ISBN	1-280-55869-5 9786610558698 3-527-60174-0
Descrizione fisica	1 online resource (411 pages)
Disciplina	572/.793
Soggetti	Glycosidases - Inhibitors Imino compounds - Physiological effect Enzyme Inhibitors Glycoside Hydrolases Amino Sugars Carbohydrates Molecular Mechanisms of Pharmacological Action Hydrolases Pharmacologic Actions Chemicals and Drugs Enzymes Chemical Actions and Uses Enzymes and Coenzymes Animal Biochemistry Human Anatomy & Physiology Health & Biological Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	Substances that inhibit sugar degradation in the body, so-called "glycosidase inhibitors" are used in the therapy of diabetes mellitus. They are important aids to explain the construction and degradation,

particularly of complex carbohydrate side chains such as those found in glycoproteins and glycolipids. This book gives a representative cross-section of the field. A table of more than 400 glycosidase inhibitors completes the book.
