

1. Record Nr.	UNINA9911019338103321
Titolo	Proceedings of the 42nd Conference on Glass Problems : a collection of papers presented at the 42nd Conference on Glass Problems ; Nov. 10-11, 1981, University of Illinois at Urbana-Champaign, Illini Union Building, Urbana, Illinois // sponsored by the Departments of Ceramic Engineering, University of Illinois and Ohio State University ; Clifton G. Bergeron, conference director
Pubbl/distr/stampa	Columbus, OH, : American Ceramic Society, 1982
ISBN	9786612314049 9781282314047 1282314041 9780470318744 0470318740 9780470320433 0470320435
Edizione	[1st ed.]
Descrizione fisica	1 online resource (112 p.)
Collana	Ceramic engineering and science proceedings, , 0196-6219 ; ; v. 3, no. 3-4
Altri autori (Persone)	BergeronClifton G
Disciplina	666.1
Soggetti	Glass manufacture Glass
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Proceedings of the 42nd Conference on Glass Problems; Table of Contents; Emission Control for Glass Production Furnaces: A Comparison of Needs and Delivery; Kerr's Evolution with Baghouses for Particulate Control from Container Furnaces; Continuous Monitoring of NOx Emissions from Glass Furnaces; Post Combustion NOx Control Technology for Glass Furnaces; An Effective Method of Combustion Control and Heat Recovery for Regenerative Furnaces, Part I; Air Management for Regenerative Glass Furnaces; Low Soda Glass Development History of High Temperature Materials for Hot-Glass Handling in Owens-Illinois Bottle PlantsThe Determination of Refractory

Contaminants in Container-Glass Raw Materials; Glass Containers and the Consumer; Glass Recycling; Platinum-Glass Reactions

Sommario/riassunto

This volume is part of the Ceramic Engineering and Science Proceeding (CESP) series. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.
