Motivation and the Village Community: I, The witch 12. Motivation and the Village Community: II. Victims and Accusers 13. Dreams, Drugs and Madness: Conclusion; Select Bibliography; Index
Sommario/riassunto	Though it is clearly an exceptionally important part of popular culture, witchcraft has generated a variety of often contradictory interpretations, starting from widely differing premises about the nature of witchcraft, its social role and the importance of higher theology as well as more popular beliefs. This work offers a conspectus of historical work on witchcraft in Europe, and shows how many trends converged to form the figure of the witch, and varied from one part of Europe to another.

2. Record Nr.	UNINA9911019420203321

Ortner -- Metabolic bone disease / Simon Mays -- Tumours and tumour-like processes / Don Brothwell -- Advances in the palaeopathology of teeth and jaws / Alan Ogden -- Trauma / Pia Bennike -- Congenital anomalies / Ethne Barnes --

Growth in archaeological populations / Ron Pinhasi.

Sommario/riassunto

This volume presents a truly integrated methodological and biocultural approach to the expanding discipline of human palaeopathology. The book provides researchers and practitioners with a comprehensive guide to the main methods and techniques that are currently available for studying diseases and related conditions from human skeletal remains. It also describes the ways in which these methods can be applied to the reconstruction of health and disease in the past. The first part of the book deals with the survival of palaeopathological evidence and provides an up-to-date account of some o
