

1. Record Nr.	UNINA9911019482903321
Autore	Akay Metin
Titolo	Information Technologies in Medicine, Rehabilitation and Treatment: Vol. 2: Rehabilitation and Treatment
Pubbl/distr/stampa	[Place of publication not identified], : Wiley IEEE Press Imprint, 2001
ISBN	1-280-55623-4 9786610556236 0-471-20645-8
Descrizione fisica	1 online resource (204 pages)
Disciplina	610.285
Soggetti	Medicine Health & Biological Sciences Medical & Biomedical Informatics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	A comprehensive survey of technological developments in Virtual Reality for use in a variety of medical procedures Medicine and the biological sciences have long relied on visualizations to illustrate the relationship between anatomic structure and biologic function. The new multidimensional imaging modalities are powerful counterparts to traditional forms of observation-surgery, postmortem examination, or extensive mental reconstruction. VR technologies have reached unimagined levels of sophistication and utility, giving physicians and students new avenues for planning and practicing surgery and diagnostics. The two volumes of Information Technologies in Medicine thoroughly explore the use of VR technology in three-dimensional visualization techniques, realistic surgical training prior to patient contact, and actual procedures in rehabilitation and treatment, including telemedicine and telesurgery. Editors Akay and Marsh have brought together all the available information on the subject of VR technologies in medicine and medical training to create the first comprehensive guide to the state of the art in medicine for use by students, doctors, and researchers.; Volume II concentrates on VR

technologies specifically in the area of rehabilitation and treatment and provides complete coverage of the most recent advancements in high-tech medicine.
