

1. Record Nr.	UNINA9911019615503321
Titolo	Vaccines against virally induced cancers
Pubbl/distr/stampa	Chichester ; ; New York, : J. Wiley, 1994
ISBN	9786612137921 9781282137929 1282137921 9780470514672 0470514671 9780470514689 047051468X
Descrizione fisica	1 online resource (293 p.)
Collana	Ciba Foundation symposium ; ; 187
Altri autori (Persone)	Frazerl. H (Ian H.)
Disciplina	616.99/4079
Soggetti	Viral carcinogenesis Viral vaccines Cancer - Immunotherapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Ciba Foundation" --Cover. Symposium held at the Ciba Foundation, London, 15-17 March 1994, based on a proposal by Ian Frazer.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	VACCINES AGAINST VIRALLY INDUCED CANCERS; Contents; Participants; Introduction; Potential antigenic targets on Epstein - Barr virus-associated tumours and the host response; The host response to lesions induced by human papillomavirus; General discussion I; Human T cell lymphotropic virus: necessity for and feasibility of a vaccine; Vaccination against cutaneous and mucosal papillomavirus in cattle; Strategies for studying mouse and human immune responses to human papillomavirus type 16 Prospects for T cell immunotherapy of tumours by vaccination with immunodominant and subdominant peptidesHepatitis B virus infection, the immune response and hepatocellular carcinoma; The role of superantigens in the immunobiology of retroviruses; General discussion II; Assembly and transport of class I MHC-peptide complexes; Induction and regulation of CD4+ T cell subsets;

Propagation of mouse and human T cells with defined antigen specificity and function; Immunity to the HER-2neu oncogenic protein  
Genetic modification of T cell clones to improve the safety and efficacy of adoptive T cell therapy  
Bone marrow-derived cells present MHC class I-restricted tumour antigens in priming of antitumour immune responses; Evasion of host immune responses by tumours and viruses;  
Final discussion; Index of contributors; Subject index

#### Sommario/riassunto

An interdisciplinary and multinational group of specialists present contributions describing the current status of vaccines against virally induced tumors and discuss the means by which they can be improved.
