

1. Record Nr.	UNINA9911019621103321
Titolo	Aluminum in biology and medicine
Pubbl/distr/stampa	Chichester [England] ; ; New York, : Wiley, 1992
ISBN	9786612347801 9781282347809 1282347802 9780470514306 0470514302 9780470514313 0470514310
Edizione	[1st ed.]
Descrizione fisica	1 online resource (336 p.)
Collana	Ciba Foundation symposium ; ; 169
Altri autori (Persone)	ChadwickDerek WhelanJulie
Disciplina	612/.01524
Soggetti	Aluminum - Physiological effect Aluminum - Pathophysiology Alzheimer's disease - Pathophysiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Editors, Derek J. Chadwick (organizer) and Julie Whelan. "A Wiley-Interscience publication."
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	ALUMINIUM IN BIOLOGY AND MEDICINE; Contents; Aluminium in biology: an introduction; Aluminium speciation in biology; Dietary and other sources of aluminium intake; The interrelationship between silicon and aluminium in the biological effects of aluminium; The epidemiology of Alzheimer's disease in relation to aluminium; Aluminium and the pathogenesis of Alzheimer's disease: a summary of evidence; Intestinal absorption of aluminium; Aluminium intoxication in renal disease; Aluminium and Alzheimer's disease Aluminium accumulation, B-amyloid deposition and neurofibrillary changes in the central nervous systemAluminium(III) in experimental cell pathology; Elemental analysis of neurofibrillary tangles in Alzheimer's disease using proton-induced X-ray analysis; Aluminium and the neurofibrillary tangle: results of tissue microprobe studies;

Intracellular effects of aluminium on receptor-activated cytoplasmic Ca^{2+} signals in pancreatic acinar cells; Neurotoxic effects of dietary aluminium

Molecular characterization and measurement of Alzheimer's disease pathology: implications for genetic and environmental aetiologySumming-up; Index of contributors; Subject index

Sommario/riassunto

Prominent contributors address issues regarding the toxicity of aluminum which causes an encephalopathy in renal dialysis patients and is also known to damage animals and plants via acid rain. Examines the chemistry and biology of aluminum compounds focusing on the evidence for and against aluminum's role in Alzheimer's disease.
