

1. Record Nr.	UNINA9911019639603321
Titolo	Chromenes, chromanones, and chromones // edited by G. P. Ellis
Pubbl/distr/stampa	New York, : Wiley, c1977
ISBN	9786612301766 9781282301764 1282301764 9780470187012 0470187018 9780470188521 0470188529
Descrizione fisica	1 online resource (1213 p.)
Collana	Chemistry of heterocyclic compounds ; ; 31
Altri autori (Persone)	EllisG. P (Gwynn Pennant)
Disciplina	547.592 547/.59/05 547/.592
Soggetti	Benzopyrans Chromans Chromone
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	CHROMENES, CHROMANONES, AND CHROMONES; Contents; I. Chromenes, Chromanones, and Chromones-Introduction; II. 2H- and 4H-1-Benzopyrans; III. 3- and 4-Chromanols; IV. 3-Chromanones; V. 4-Chromanones; VI. 2,4-Chromandiones and 2,3,4-Chromantriones; VII. Naturally Occurring Chromones; VIII. Analytical Aspects of Chromones; IX. General Methods of Preparing Chromones; X. Chromone and Its Benzo Derivatives; XI. Alkylchromones; XII. Hydroxychromones; XIII. Alkoxychromones; XIV. Halochromones; XV. Nitrochromones; XVI. Aminochromones; XVII. Ketonic Chromones XVIII. Chromone Carbonitriles and Tetrazole DerivativesXIX. C hromone Carboxaldehydes; XX. Chromone Carboxylic Acids and Their Derivatives; XXI. Bischromones and Bichromones; Author Index; Subject Index

Chromenes, Chromanones, and Chromones-Introduction (G. P. Ellis). 2H - and 4H -1-Benzopyrans (E. E. Schweizer and Deborah Meeder-Nycz). 3- and 4- Chromanols (I. M. Lockhart). 3-Chromanones (I. M. Lockhart). 4-Chromanones (I. M. Lockhart). 2,4-Chromandiones and 2,3,4-Chromantriones (I. M. Lockhart). Naturally Occurring Chromones (G. P. Ellis). Analytical Aspects of Chromones (G. P. Ellis). General Methods of Preparing Chromones (G. P. Ellis). Chromone and Its Benzo Derivatives (G. P. Ellis). Alkylchromones (G. P. Ellis). Hydroxychromones (G. P. Ellis). Alkoxychromones (G. P. Ellis). Halochromon
