Minds and Machines: Connectionism and Psychological Modeling
examines different kinds of models and investigates some of the basic
properties of connectionism in the context of synthetic psychology,
including detailed accounts of how the internal structure of
connectionist networks can be interpreted. Introduces connectionist
models as tools that are both synthetic and representational and which
can be used as the basis for conducting synthetic psychology. Includes
distinctively varied account of modeling, historical overview of the
synthetic approach, and unique

Sommario/riassunto	Ageismus hat weitreichende Auswirkungen. Durch den erstmaligen Transfer und die Anwendung von Konzepten aus der feministischen Medizinethik eröffnet Elisabeth Langmann neue Perspektiven auf das Phänomen und ermöglicht ein tiefgreifendes Verständnis von Ageismus mit seinen vielfältigen Formen und Implikationen auf Gesundheit und Selbstbestimmung. Mit einer kritischen Analyse der Problematik zeigt sie außerdem Wege zu einer gerechteren Gesundheitsversorgung auf und gibt wertvolle Einsichten für alle, die sich mit den Chancen und Herausforderungen des Alterns im Kontext von Gesundheit beschäftigen.
