

1. Record Nr.	UNINA9911019771503321
Autore	Caers Jef
Titolo	Modeling uncertainty in the earth sciences / / Jef Caers
Pubbl/distr/stampa	Hoboken, N.J., : Wiley, 2011
ISBN	9786613177971 9781283177979 1283177978 9781119998716 1119998719 9781119995937 1119995930 9781119995920 1119995922
Edizione	[1st ed.]
Descrizione fisica	1 online resource (240 p.)
Disciplina	551.01/5195
Soggetti	Geology - Mathematical models Earth sciences - Statistical methods Three-dimensional imaging in geology Uncertainty
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Modeling Uncertainty in the Earth Sciences -- Contents -- Preface -- Acknowledgements -- 1 Introduction -- 1.1 Example Application -- 1.1.1 Description -- 1.1.2 3D Modeling -- 1.2 Modeling Uncertainty -- Further Reading -- 2 Review on Statistical Analysis and Probability Theory -- 2.1 Introduction -- 2.2 Displaying Data with Graphs -- 2.2.1 Histograms -- 2.3 Describing Data with Numbers -- 2.3.1 Measuring the Center -- 2.3.2 Measuring the Spread -- 2.3.3 Standard Deviation and Variance -- 2.3.4 Properties of the Standard Deviation -- 2.3.5 Quantiles and the QQ Plot -- 2.4 Probability -- 2.4.1 Introduction -- 2.4.2 Sample Space, Event, Outcomes -- 2.4.3 Conditional Probability -- 2.4.4 Bayes' Rule -- 2.5 Random Variables -- 2.5.1 Discrete Random Variables -- 2.5.2 Continuous Random

Variables -- 2.5.2.1 Probability Density Function (pdf) -- 2.5.2.2 Cumulative Distribution Function -- 2.5.3 Expectation and Variance -- 2.5.3.1 Expectation -- 2.5.3.2 Population Variance -- 2.5.4 Examples of Distribution Functions -- 2.5.4.1 The Gaussian (Normal) Random Variable and Distribution -- 2.5.4.2 Bernoulli Random Variable -- 2.5.4.3 Uniform Random Variable -- 2.5.4.4 A Poisson Random Variable -- 2.5.4.5 The Lognormal Distribution -- 2.5.5 The Empirical Distribution Function versus the Distribution Model -- 2.5.6 Constructing a Distribution Function from Data -- 2.5.7 Monte Carlo Simulation -- 2.5.8 Data Transformations -- 2.6 Bivariate Data Analysis -- 2.6.1 Introduction -- 2.6.2 Graphical Methods: Scatter plots -- 2.6.3 Data Summary: Correlation (Coefficient) -- 2.6.3.1 Definition -- 2.6.3.2 Properties of r -- Further Reading -- 3 Modeling Uncertainty: Concepts and Philosophies -- 3.1 What is Uncertainty? -- 3.2 Sources of Uncertainty -- 3.3 Deterministic Modeling -- 3.4 Models of Uncertainty -- 3.5 Model and Data Relationship. 3.6 Bayesian View on Uncertainty -- 3.7 Model Verification and Falsification -- 3.8 Model Complexity -- 3.9 Talking about Uncertainty -- 3.10 Examples -- 3.10.1 Climate Modeling -- 3.10.1.1 Description -- 3.10.1.2 Creating Data Sets Using Models -- 3.10.1.3 Parameterization of Subgrid Variability -- 3.10.1.4 Model Complexity -- 3.10.2 Reservoir Modeling -- 3.10.2.1 Description -- 3.10.2.2 Creating Data Sets Using Models -- 3.10.2.3 Parameterization of Subgrid Variability -- 3.10.2.4 Model Complexity -- Further Reading -- 4 Engineering the Earth: Making Decisions Under Uncertainty -- 4.1 Introduction -- 4.2 Making Decisions -- 4.2.1 Example Problem -- 4.2.2 The Language of Decision Making -- 4.2.3 Structuring the Decision -- 4.2.4 Modeling the Decision -- 4.2.4.1 Payoffs and Value Functions -- 4.2.4.2 Weighting -- 4.2.4.3 Trade-Offs -- 4.2.4.4 Sensitivity Analysis -- 4.3 Tools for Structuring Decision Problems -- 4.3.1 Decision Trees -- 4.3.2 Building Decision Trees -- 4.3.3 Solving Decision Trees -- 4.3.4 Sensitivity Analysis -- Further Reading -- 5 Modeling Spatial Continuity -- 5.1 Introduction -- 5.2 The Variogram -- 5.2.1 Autocorrelation in 1D -- 5.2.2 Autocorrelation in 2D and 3D -- 5.2.3 The Variogram and Covariance Function -- 5.2.4 Variogram Analysis -- 5.2.4.1 Anisotropy -- 5.2.4.2 What is the Practical Meaning of a Variogram? -- 5.2.5 A Word on Variogram Modeling -- 5.3 The Boolean or Object Model -- 5.3.1 Motivation -- 5.3.2 Object Models -- 5.4 3D Training Image Models -- Further Reading -- 6 Modeling Spatial Uncertainty -- 6.1 Introduction -- 6.2 Object-Based Simulation -- 6.3 Training Image Methods -- 6.3.1 Principle of Sequential Simulation -- 6.3.2 Sequential Simulation Based on Training Images -- 6.3.3 Example of a 3D Earth Model -- 6.4 Variogram-Based Methods -- 6.4.1 Introduction -- 6.4.2 Linear Estimation. 6.4.3 Inverse Square Distance -- 6.4.4 Ordinary Kriging -- 6.4.5 The Kriging Variance -- 6.4.6 Sequential Gaussian Simulation -- 6.4.6.1 Kriging to Create a Model of Uncertainty -- 6.4.6.2 Using Kriging to Perform (Sequential) Gaussian Simulation -- Further Reading -- 7 Constraining Spatial Models of Uncertainty with Data -- 7.1 Data Integration -- 7.2 Probability-Based Approaches -- 7.2.1 Introduction -- 7.2.2 Calibration of Information Content -- 7.2.3 Integrating Information Content -- 7.2.4 Application to Modeling Spatial Uncertainty -- 7.3 Variogram-Based Approaches -- 7.4 Inverse Modeling Approaches -- 7.4.1 Introduction -- 7.4.2 The Role of Bayes' Rule in Inverse Model Solutions -- 7.4.3 Sampling Methods -- 7.4.3.1 Rejection Sampling -- 7.4.3.2 Metropolis Sampler -- 7.4.4 Optimization Methods -- Further Reading -- 8 Modeling Structural Uncertainty -- 8.1 Introduction -- 8.2 Data for Structural Modeling in

the Subsurface -- 8.3 Modeling a Geological Surface -- 8.4
 Constructing a Structural Model -- 8.4.1 Geological Constraints and
 Consistency -- 8.4.2 Building the Structural Model -- 8.5 Gridding the
 Structural Model -- 8.5.1 Stratigraphic Grids -- 8.5.2 Grid Resolution
 -- 8.6 Modeling Surfaces through Thicknesses -- 8.7 Modeling
 Structural Uncertainty -- 8.7.1 Sources of Uncertainty -- 8.7.2 Models
 of Structural Uncertainty -- Further Reading -- 9 Visualizing
 Uncertainty -- 9.1 Introduction -- 9.2 The Concept of Distance -- 9.3
 Visualizing Uncertainty -- 9.3.1 Distances, Metric Space and
 Multidimensional Scaling -- 9.3.2 Determining the Dimension of
 Projection -- 9.3.3 Kernels and Feature Space -- 9.3.4 Visualizing the
 Data-Model Relationship -- Further Reading -- 10 Modeling Response
 Uncertainty -- 10.1 Introduction -- 10.2 Surrogate Models and Ranking
 -- 10.3 Experimental Design and Response Surface Analysis -- 10.3.1
 Introduction.
 10.3.2 The Design of Experiments -- 10.3.3 Response Surface Designs
 -- 10.3.4 Simple Illustrative Example -- 10.3.5 Limitations -- 10.4
 Distance Methods for Modeling Response Uncertainty -- 10.4.1
 Introduction -- 10.4.2 Earth Model Selection by Clustering -- 10.4.2.1
 Introduction -- 10.4.2.2 k-Means Clustering -- 10.4.2.3 Clustering of
 Earth Models for Response Uncertainty Evaluation -- 10.4.3 Oil
 Reservoir Case Study -- 10.4.4 Sensitivity Analysis -- 10.4.5
 Limitations -- Further Reading -- 11 Value of Information -- 11.1
 Introduction -- 11.2 The Value of Information Problem -- 11.2.1
 Introduction -- 11.2.2 Reliability versus Information Content -- 11.2.3
 Summary of the VOI Methodology -- 11.2.3.1 Steps 1 and 2: VOI
 Decision Tree -- 11.2.3.2 Steps 3 and 4: Value of Perfect Information
 -- 11.2.3.3 Step 5: Value of Imperfect Information -- 11.2.4 Value of
 Information for Earth Modeling Problems -- 11.2.5 Earth Models --
 11.2.6 Value of Information Calculation -- 11.2.7 Example Case Study
 -- 11.2.7.1 Introduction -- 11.2.7.2 Earth Modeling -- 11.2.7.3
 Decision Problem -- 11.2.7.4 The Possible Data Sources -- 11.2.7.5
 Data Interpretation -- Further Reading -- 12 Example Case Study --
 12.1 Introduction -- 12.1.1 General Description -- 12.1.2 Contaminant
 Transport -- 12.1.3 Costs Involved -- 12.2 Solution -- 12.2.1 Solving
 the Decision Problem -- 12.2.2 Buying More Data -- 12.2.2.1 Buying
 Geological Information -- 12.2.2.2 Buying Geophysical Information --
 12.3 Sensitivity Analysis -- Index.

Sommario/riassunto

'Modeling Uncertainty in the Earth Sciences' highlights the various
 issues, techniques and practical modeling tools available for modeling
 the uncertainty of complex earth systems and the impact that it has on
 practical situations.
