Edizione	[1st ed.]
Descrizione fisica	1 online resource (293 pages)
Collana	ISTE Invoiced Series
Altri autori (Persone)	PeerbayeAshveen
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Science and technology profoundly shape the world today. Over the last two centuries, they have become powerful engines of change, accounting for some of the most important forms of human activity, inseparable from social, political and economic life. Analyzing their modes of production, the dynamics of their dissemination, the different forms of their use and opposition to them is a major academic and political challenge. Science and Technology in Society offers a broad overview of work carried out in France, in the international multi-disciplinary field of Science and Technology Studies (STS), and is the product of a collaboration between some thirty authors. It aims to provide an introduction to this field of research, its development, benefits and the new perspectives that are emerging. This book presents and discusses studies that are still little-known in France, even though, paradoxically, many researchers from French institutions make decisive contributions to international work in this field.
