

1. Record Nr.	UNINA9911019828303321
Titolo	Functional coatings : by polymer microencapsulation // edited by Swapan Kumar Ghosh
Pubbl/distr/stampa	Weinheim, : Wiley-VCH Chichester, : John Wiley [distributor], 2006
ISBN	9786610723515 9781280723513 1280723513 9783527608416 3527608419 9783527608478 3527608478
Descrizione fisica	1 online resource (373 p.)
Altri autori (Persone)	GhoshSwapan K
Disciplina	667.9
Soggetti	Coatings Polymers Polymerization Microencapsulation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Functional Coatings; Table of Contents; Preface; List of Contributors; 1 Functional Coatings and Microencapsulation: A General Perspective; 1.1 An Overview of Coatings and Paints; 1.2 Classification of Coating Properties; 1.3 What are Functional Coatings?; 1.4 Types and Application of Functional Coatings; 1.4.1 Anticorrosive Coatings; 1.4.2 High Thermal-Resistant and Fire-Retardant Coatings; 1.4.3 Scratch- and Abrasion-Resistant Coatings; 1.4.4 Self-Cleaning Coatings; 1.4.5 Antibacterial Coatings; 1.4.6 Antifouling Coatings; 1.5 Microencapsulation; 1.6 Microcapsules 1.7 Morphology of Microcapsules1.8 Benefits of Microencapsulation; 1.9 Microencapsulation Techniques; 1.9.1 Chemical Methods; 1.9.2 Physico-Chemical Processes; 1.9.3 Physico-Mechanical Processes; 1.10

Enhancing Coating Functionalities with Microcapsules; 1.11  
 Conclusions; Abbreviations; References; 2 Encapsulation Through (Mini)  
 Emulsion Polymerization; 2.1 Introduction; 2.2 The Miniemulsion  
 Process; 2.3 Different Polymers for the Formation of Nanocapsules in  
 Miniemulsions; 2.3.1 Radical Polymerization; 2.3.2 Polyaddition; 2.3.3  
 Polycondensation; 2.3.4 Anionic Polymerization  
 2.3.5 Metal-Catalyzed Polymerization Reactions2.3.6 Enzymatic  
 Polymerization; 2.4 Nanocapsule Particles by Miniemulsion  
 Technologies; 2.4.1 Encapsulation of a Liquid: The Formation of  
 Nanocapsules; 2.4.2 Nanocapsules with a Shell Obtained by Surface  
 Coating of Miniemulsions with Inorganic Nanoparticles and Crystalline  
 Building Blocks; 2.4.3 Encapsulation of Pigments by Direct  
 Miniemulsification; 2.4.4 Encapsulation by Co-Miniemulsion; 2.5  
 Nanocapsules with Non-Radical Polymerizations in Miniemulsion; 2.6  
 Conclusions; Abbreviations; References  
 3 Microcapsules through Layer-by-Layer Assembly Technique3.1  
 Introduction; 3.2 Responsive Multilayers on Planar Substrates; 3.3  
 Microcapsules; 3.3.1 Switchable Permeability of Hollow Microcapsules:  
 A Tool for Macromolecule Encapsulation; 3.3.2 Microcapsules Loaded  
 with "Smart" Polymers; 3.4 Composite Polyelectrolyte/Inorganic  
 Microcapsules; 3.4.1 Synthesis; 3.4.2 Mechanical and Permeability  
 Properties of Composite Microcapsules; 3.5 Conclusions and Outlook;  
 Acknowledgments; Abbreviations; References; 4 Polymer Encapsulation  
 of Inorganic Particles; 4.1 Introduction  
 4.2 Background Knowledge of Heterophase Polymerization Processes4.  
 2.1 General Classification; 4.2.2 Oil-in-Water Suspension  
 Polymerization; 4.2.3 Oil-in-Water Emulsion Polymerization; 4.2.4  
 Precipitation and Dispersion Polymerizations; 4.2.5 Oil-in-Water  
 Miniemulsion Polymerization; 4.2.6 Applications of Polymer Latexes;  
 4.3 Inorganic Particles; 4.4 Polymer Encapsulation of Inorganic  
 Particles; 4.4.1 Synthetic Strategies; 4.4.2 Examples of Polymer-  
 Encapsulated Pigments and Fillers; 4.4.3 Other Heterophase Polymer  
 Encapsulation Techniques; 4.4.4 Surface-Initiated Polymerizations  
 4.5 Organic/Inorganic Particle Morphology

## Sommario/riassunto

This first book to concentrate on providing a concise, representative overview of polymer microencapsulation for novel organic coatings and all its chemical and engineering aspects collates the literature hitherto spread out among journals in various disciplines. It covers all the important methods for carrying out microencapsulations, including in situ polymerization, phase separation, emulsification, grinding and spray drying. The result is a solid, introduction from first-hand practitioners working in industry and research institutions for newcomers to the field. It is equally vital reading
