| Titolo | Geographic visualization : concepts, tools and applications / / edited by Martin Dodge, Mary McDerby and Martin Turner |
| Pubbl/distr/stampa | Chichester, England ; ; Hoboken, NJ, : Wiley, c2008 |
| ISBN | 9786612349898 9780470987643 0470987642 9781282349896 1282349899 9780470987636 0470987634 9781119964599 1119964598 |
| Descrizione fisica | xxiv, 325 p. : ill. (some col.), maps |
| Altri autori (Persone) | DodgeMartin <1971-> McDerbyMary TurnerMartin <1968-> (Martin John Turner) |
| Disciplina | 910.285 |
| Soggetti | Geography - Computer network resources Visualization Geographic information systems |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di bibliografia | Includes bibliographical references and index. |
| Sommario/riassunto | Geographic Visualization: Concepts, Tools and Applications is a 'state-of-the-art' review of the latest developments in the subject. It examines how new concepts, methods and tools can be creatively applied to solve problems relevant to a wide range of topics. The text covers the impact of three-dimensional displays on user interaction along with the potentialities in animation and clearly explains how to create temporally sensitive visualizations. It also explores the potential for handling mobile data and representing uncertainty; as well as the role of participatory visualization systems and exploratory methods. |

Hallmark Features: * An introduction to the diverse forms of geographic visualization which draws upon a number of theoretical perspectives and disciplines to provide an insightful commentary on new methods, techniques and tools. * Richly illustrated in full colour throughout, including numerous relevant case studies and accessible discussions of important visualization concepts to enable clearer understanding for non-technical audiences. * Chapters are written by leading scholars and researchers in a range of cognate fields, including, cartography, GIScience, architecture, art, urban planning and computer graphics with case studies drawn from Europe, North America and Australia This book is an invaluable resource for all graduate students, researchers and professionals working in the geographic information sector, computer graphics and cartography.
