Formation of the contract -- pt. 2. Performance of the contract -- pt. 3. Discharge of the contract -- pt. 4. Sub-contracts and sub-contracting -- pt. 5. Building contracts and the law of tort.

The interaction between general principles and the provisions of the standard building and construction contracts is a central feature of construction law. The major part of the law is laid down in decided cases, and construction professionals should be familiar with these cases but the information is scattered throughout a large number of law reports. The fifth edition of Powell Smith and Furmston's Building Contract Casebook is designed to help construction professionals become familiar with those key cases. It brings together a wide range of cases on the main aspects of the law of con
