

1. Record Nr.	UNINA9911019894503321
Autore	Otranto Domenico
Titolo	Veterinary Parasitology
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2024 ©2024
ISBN	9781394176359 139417635X 9781394176366 1394176368 9781394176373 1394176376
Edizione	[5th ed.]
Descrizione fisica	1 online resource (899 pages)
Altri autori (Persone)	WallRichard
Disciplina	636.089/696
Soggetti	Veterinary parasitology Parasitic diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- Preface to the fifth edition -- Acknowledgements -- Introduction -- Taxonomic tables -- Part 1: Parasites and infection -- Chapter 1 Veterinary helminthology -- Principles of classification -- Helminthology -- Structure and function -- Basic nematode life cycle -- Development of the parasite -- Metabolism -- Arrested larval development -- Periparturient rise in faecal egg counts -- Structure and function of trematodes -- Life cycle of trematodes -- Structure and function -- Life cycle -- Chapter 2 Veterinary protozoology -- Structure and function of protozoa -- Classification -- Morphology -- Transmission of trypanosome infection in animals -- Salivarian trypanosomes -- Stercorarian trypanosomes -- Generalised life cycle -- Miscellaneous 'protozoal' organisms -- Chapter 3 Veterinary entomology -- Classification -- Structure and function -- General morphology and life cycle -- Louse life cycles -- Flea life cycles -- The mites -- Chapter 4 Laboratory diagnosis and identification -- Helminth infections -- Faecal examination -- Collection of faeces -- Methods of examination

of faeces -- Identification of nematode eggs -- Identification of trematode eggs -- Larval recovery -- Recovery of adult nematodes -- Key to the identification of gastrointestinal nematodes of ruminants -- Recovery of adult lungworms -- Recovery of trematode and cestode parasites -- Other aids to diagnosis of ruminant nematodes -- DNA-based methods -- Protozoal infections -- Examination of faecal samples for coccidia -- Examination of faecal samples for other protozoa -- Examination of blood and lymph -- Examination of skin -- Xenodiagnosis -- Other diagnostic techniques -- Ectoparasites -- Diptera -- Lice and fleas -- Ticks and mites -- Mounting and preservation -- Chemicals and solutions -- Flotation solutions. Worm count solutions -- Stains -- Chapter 5 Antiparasitics and resistance -- Anthelmintics -- Mode of action -- Anthelmintic use -- Methods of administration -- Antiprotozoals -- Mode of action -- Use of antiprotozoals -- Methods of administration -- Ectoparasiticides: insecticides and acaricides -- Mode of action -- Methods of application and uses -- Parasiticide resistance -- Anthelmintic resistance -- Antiprotozoal resistance -- Insecticide resistance -- Chapter 6 Innate and acquired resistance, vaccines and alternative approaches to parasite management -- Innate resistance to parasitic infection -- Species resistance -- Age resistance -- Breed resistance -- Selection for resistance -- Acquired immunity to helminth infections -- Effect of the immune response -- Evasion of the host's immune response -- Cost of the immune response -- Acquired immunity to protozoal infections -- Acquired immunity to arthropod infestations -- Vaccines -- Vaccines for helminths -- Vaccines for protozoa -- Vaccines for ectoparasites -- Non-chemical control -- Nematophagous and entomopathogenic fungi -- Dietary supplementation -- Topical application of plant-derived bioactives -- Physical approaches -- Chapter 7 Epidemiology of parasitic disease and the environmental impacts of its management -- The epidemiology of parasitic disease -- Increased numbers of infective stages -- Increased development or survival rates of infective stages -- Alteration in host susceptibility in existing infection -- Altered susceptibility to the acquisition of new infections -- Introduction of susceptible stock -- Introduction of infection into a clean environment -- Environmental impacts of parasite treatment -- Livestock -- Companion animals -- Part 2: Clinical parasitic disease and treatment -- Chapter 8 Parasites of cattle -- Endoparasites -- Parasites of the digestive system. Parasites of the respiratory system -- Parasites of the liver -- Parasites of the pancreas -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Parasites of the connective tissue -- Parasites of the integument -- Ectoparasites -- Biting and nuisance flies -- Lice -- Mites -- Ticks -- Cattle parasite checklist -- Chapter 9 Parasites of sheep and goats -- Endoparasites -- Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the pancreas -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Parasites of the integument -- Ectoparasites -- Flies -- Fly strike (myiasis) -- Lice -- Mites -- Ticks -- Sheep parasite checklist -- Goat parasite checklist -- Chapter 10 Parasites of horses -- Endoparasites -- Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Parasites of the integument -- Ectoparasites -- Flies -- Lice --

Mites -- Ticks -- Horse parasite checklist -- Chapter 11 Parasites of pigs -- Endoparasites -- Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the pancreas -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Parasites of the integument -- Ectoparasites -- Lice -- Fleas -- Mites -- Ticks -- Pig parasite checklist -- Chapter 12 Parasites of dogs and cats -- Endoparasites. Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Parasites of the integument -- Ectoparasites -- Fleas -- Lice -- Flies -- Culicidae -- Bugs -- Mites -- Ticks -- Dog parasite checklist -- Cat parasite checklist -- Chapter 13 Parasites of poultry and gamebirds -- Endoparasites -- Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Parasites of the integument -- Ectoparasites -- Hemiptera -- Lice -- Fleas -- Mites -- Ticks -- Chicken parasite checklist -- Turkey parasite checklist -- Duck parasite checklist -- Goose parasite checklist -- Pheasant parasite checklist -- Partridge parasite checklist -- Quail parasite checklist -- Guinea fowl parasite checklist -- Chapter 14 Parasites of ungulates -- Deer -- Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Parasites of the connective tissue -- Camels -- Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the pancreas -- Parasites of the circulatory system -- Parasites of the eye -- Parasites of the nervous system -- Parasites of the locomotory system -- Parasites of the connective tissue -- Llamas, alpacas, guanacos, vicuñas -- Parasites of the digestive system -- Parasites of the respiratory system. Parasites of the liver -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Water buffalo -- Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the pancreas -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Parasites of the connective tissue -- Deer parasite checklist -- Camel parasite checklist -- Camelids parasite checklist -- Buffalo parasite checklist -- Chapter 15 Parasites of laboratory animals -- Rabbits -- Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Guinea pigs -- Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Parasites of the integument -- Rats and mice -- Parasites of the digestive system -- Parasites of the respiratory system -- Parasites of the liver -- Parasites of the circulatory system -- Parasites of the nervous system -- Parasites of the reproductive/urogenital system -- Parasites of the locomotory system -- Primates -- Parasites of the digestive system -- Parasites of the

respiratory system -- Parasites of the liver -- Parasites of the pancreas
-- Parasites of the circulatory system -- Parasites of the nervous
system -- Parasites of the reproductive/urogenital system -- Parasites
of the locomotory system -- Parasites of the integument.
Rabbit parasite checklist.

Sommario/riassunto

This comprehensive guide on veterinary parasitology, authored by Professors Domenico Otranto and Richard Wall, serves as an authoritative reference for understanding parasitic diseases in animals. The fifth edition covers a wide range of topics including the structure, function, and life cycles of various parasites such as nematodes, trematodes, protozoa, and arthropods. It also delves into laboratory diagnostic techniques, resistance to parasiticides, and alternative management approaches. The book provides detailed information on the epidemiology of parasitic diseases and their environmental impacts, along with clinical insights into the treatment of parasitic infections across different animal species such as cattle, sheep, goats, horses, and pigs. Aimed at veterinary professionals and students, this edition updates prior knowledge with the latest research and methodologies in parasitic disease management.
