Weiner and Kathryn Ragalis -- 10. Fear and anxiety management for the special needs patient / Linda M. Maytan and Gina M. Terenzi.
Sommario/riassunto	"The Fearful Dental Patient: A Guide to Understanding and Managing helps the dental professional understand the basics of fears and phobias, how to identify dental phobia, and how to overcome it in cooperation with the patient. Dr. Weiner and his colleagues are all practicing dentists and provide proven diagnosis and treatment

options. Chapters address basic concepts about patient fear, behavioral modalities to identify dental anxiety, modalities to manage dental fears, pharmacological and sedation techniques, and hypnosis. Chapters also discuss treating specific types of patients: those with psychiatric comorbidities, children, seniors, and special needs patients. The entire dental team will benefit from the practical presentation and proven methods to better understand and treat fearful patients"--Provided by publisher.
