Sommario/riassunto

Discussing the state of the art in the remote sensing of surface turbulent heat fluxes and soil surface moisture content, this book offers the most up-to-date understanding of the natural processes of Earth systems and their interactions with man-made activities. Identifying effective, accurate, and practical methods, it allows researchers to obtain much-needed data on the soilscape at decreased cost: both reducing the amount of field data collection and increasing coverage area. An all-inclusive overview of methods and modeling techniques, it provides case studies and considers future tren

HUMAN GENETIC INFORMATION : SCIENCE, LAW AND ETHICS; Contents; Introduction; The human genome: the nature of the enterprise; Prenatal diagnosis: current approaches and future trends; The use of genetic markers for personal identification and the analysis of family relationships; Recent advances in the genetics of psychiatric disorder; The problem of polygenic disease; Limits to genetic intervention in humans: somatic and germline; Who has the right to know the genetic constitution of a particular person?; Human genetic information: the legal implications
Commercial exploitation of the human genome: what are the problems? Religious aspects of human genetic information; Who might I have been?; Human genome analysis and the concept of human nature; Summing-up; Index of contributors; Subject index

Sommario/riassunto

As part of a continuing effort to tackle issues of major social concern, this 280th conference of internationally recognized experts from the fields of molecular biology, medicine, philosophy, theology, and the law looks into the scientific, legal, ethical, social, and economic issues confronting man and his ability to map and sequence the human genome. A wide variety of subjects are covered, including prenatal diagnosis, advances in the genetics of psychiatric disorders, the problems associated with polygenic disease, and the limits to genetic intervention in humans. The symposium also discusses
