Nota di contenuto	Manual restraint of the avian patient -- Blood collection -- Injection techniques -- Oral administration of medications -- Dermatologic procedures -- Ophthalmic procedures -- Sinus flushing and nasal concretion removal -- Grooming procedures -- Cloacal procedures -- Surgery preparations -- Intubation -- Gavage and lavage -- Coelomocentesis -- Nebulization -- Egg retention procedures -- Cardiac procedures -- Hemostasis -- Transfusions -- Air sac cannulation and oxygen supplementation -- CPR -- Fluid therapy -- Positioning for imaging -- Euthanasia techniques -- Analgesia, Sedation and Anesthesia : Medications and Procedures.
Sommario/riassunto	"Manual of Clinical Procedures in Pet Birds provides easy-to-follow descriptions of a wide range of clinical techniques with step-by-step instructions for performing procedures in birds in the veterinary clinic, ranging from common techniques for surgery preparation and recovery, cardiology, anesthesia, imaging, sedation, and euthanasia. Each chapter includes a description of the procedure and the

equipment needed, stepwise techniques, cautions and precautions, and references. Useful rationale/amplification sections answer 'how' and 'why' questions and provide information about some of the more common problems associated with the procedure. High-quality color photographs illustrate the techniques, showing how to physically manage the bird, the equipment needed, and the steps of the procedure. An accompanying companion website has videos showing some of the procedures. With a practical format and wide coverage, *Manual of Clinical Procedures in Pet Birds* is an essential reference for any veterinarian, nurse, veterinary student, or technician treating avian patients, regardless of experience level"--
