

1. Record Nr.	UNINA9911019960203321
Autore	Li Le-Wei
Titolo	Spheroidal wave functions in electromagnetic theory // Le-Wei Li, Xiao-Kang Kang, Mook-Seng Leong
Pubbl/distr/stampa	New York, : Wiley, c2002
ISBN	9786610264797 9781280264795 1280264799 9780470340608 0470340606 9780471464181 047146418X 9780471221579 0471221570
Descrizione fisica	1 online resource (315 p.)
Collana	Wiley series in microwave and optical engineering
Altri autori (Persone)	KangXiao-Kang LeongMook-Seng
Disciplina	530.14/1
Soggetti	Electromagnetic theory Spheroidal functions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Acknowledgments; Preface; Contents; 1 Introduction; 1.1 Overview; 1.2 EM Scattering by Spheroids; 1.3 Spheroidal Antenna; 1.4 EM Radiation in Dielectric Spheroids; 1.5 Oblate Spheroidal Models; 1.6 Spheroidal Cavity System; 1.7 Spheroidal Harmonics and Mathematica Software; 2 Spheroidal Coordinates and Wave Functions; 2.1 Spheroidal Coordinate Systems; 2.2 Spheroidal Scalar Wave Functions; 2.3 Spheroidal Angular Harmonics; 2.3.1 Series Representation in Terms of Associated Legendre Functions; 2.3.2 Power Series Representation 2.7.2 Geometrical Features of Spheroidal Functions2.7.3 Tabulated Numerical Data: New Results and Comparison; 2.8 Spheroidal Vector Wave Functions; 3 Dyadic Green's Functions in Spheroidal Systems; 3.1 Dyadic Green's Functions; 3.2 Fundamental Formulation; 3.3

Unbounded Dyadic Green's Functions; 3.3.1 Method of Separation of Variables; 3.3.2 Unbounded Scalar Green's Function; 3.3.3 Appropriate Spheroidal Vector Wave Functions for Construction of DGFs; 3.3.4 Unbounded Green's Dyadics; 3.4 Scattering Green's Dyadics; 3.4.1 Scattering Green's Dyadics in the Inner Region ($f = l$)
4.3.4 Fields at Axial Incidence4.3.5 TE Fields with Incidence Angle 90° ;
4.4 Far-Field Expressions; 4.5 Numerical Computation and Mathematica Source Codes; 4.6 Results and Discussion; 5 EM Scattering by a Coated Dielectric Spheroid; 5.1 Geometry of the Problem; 5.2 Incident, Transmitted and Scattered Fields; 5.3 Relationship between Incident and Scattered Fields; 5.3.1 Boundary Conditions; 5.3.2 TE Polarization for Nonaxial Incidence; 5.3.3 TM Polarization for Nonaxial Incidence; 5.3.4 Fields at Axial Incidence; 5.4 Numerical Computation and Mathematica Source Code; 5.5 Results and Discussion
6 Spheroidal Antennas

Sommario/riassunto

The flagship monograph addressing the spheroidal wave function and its pertinence to computational electromagnetics Spheroidal Wave Functions in Electromagnetic Theory presents in detail the theory of spheroidal wave functions, its applications to the analysis of electromagnetic fields in various spheroidal structures, and provides comprehensive programming codes for those computations. The topics covered in this monograph include: Spheroidal coordinates and wave functions Dyadic Green's functions in spheroidal systems EM scattering by a conducting spheroid<b
