

1. Record Nr.	UNISA996448446503316
Autore	ANDREWS, Charles
Titolo	2.: The settlements / Charles M. Andrews
Pubbl/distr/stampa	New Haven ; London, : Yale university press, 1934
Descrizione fisica	Testo elettronico (PDF) (407 p. )
Disciplina	973.2
Soggetti	Colonie inglesi - America settentrionale - Storia - Sec. 17.-18
Lingua di pubblicazione	Inglese
Formato	Risorsa elettronica
Livello bibliografico	Monografia
2. Record Nr.	UNINA9911020033303321
Autore	Giddings Bob
Titolo	Architectural Design and Management in the Digital Age : International Perspectives
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2024 ©2025
ISBN	9781119902317 1119902312 9781119902645 1119902649 9781119902300 1119902304
Edizione	[1st ed.]
Descrizione fisica	1 online resource (243 pages)
Altri autori (Persone)	MelhadoSilvio BarrettJennifer
Disciplina	720.285
Soggetti	Architectural design - Data processing Architecture - Computer-aided design
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Cover -- Title Page -- Copyright Page -- Contents -- About the Editors  
-- About the Contributors -- Preface -- Part 1 Context -- Chapter 1  
Introduction -- Context -- Background to Architectural Management  
-- Exploring the Components of Architectural Design and Management  
in the Digital Age -- Managing the Business -- Managing Projects --  
Managing Stakeholders -- Managing Learning -- Technologies -- The  
Human Context of Digital Work -- Emerging Concepts -- Managing  
Digital Projects -- Conclusion -- References -- Part II Technologies --  
Chapter 2 The Digital Toolkit -- Introduction -- Visualisation,  
Simulation and Modelling -- Building Information Modelling --  
Extended Reality -- Artificial Intelligence -- Analysis -- Building  
Information Modelling -- Artificial Intelligence -- Automation,  
Optimisation and Prediction -- Conclusion -- Implementation Process  
-- Integration -- Future Directions -- References -- Chapter 3 Digital  
Twins and Sustainable Development Goals -- Introduction -- Current  
Digital Twins Aligning with UN SDGs -- SDGs Key Performance  
Indicators in Construction Digital Twins -- Framework for Embedding  
UN SDGs Within a Digital Twin -- Conclusion and Way Forward --  
References -- Part III The Human Context of Digital Work -- Chapter 4  
Face to Face or Online: Towards a New Relational Governance of  
Building Design Projects -- Introduction -- A New Relational  
Governance for the Digital Age -- Relational Governance and BIM --  
Towards a Framework for Collaboration in BIM Practice -- Conclusion  
-- References -- Chapter 5 Creativity in the Digital World --  
Introduction and Context -- The Concept of Creativity in Architectural  
Design -- Changing Practices -- The Architectural Project -- Analogue  
and Digital Processes -- Conclusion -- References -- Chapter 6  
Inclusion, Equity and Diversity -- Introduction and Context.  
Inclusion, Equity and Diversity in the Workplace of Architecture --  
Inclusion, Equity and Diversity in the Practice of Architecture -- The  
Way Forward -- The Conceptual -- The Practical -- Conclusions --  
References -- Chapter 7 Not Being There: The Potential for Digital  
Architecture to Reach the Disadvantaged and the Disenfranchised --  
Introduction -- Context -- The Issues -- Emergency Response --  
Rebuilding -- New Build -- Housing Marginalised Groups -- A Refugee  
Family in a Three-Storey Housing Block -- A Mori Family in a Single-  
Storey Timber House -- Summary of the Issues -- The Future --  
Conclusion -- References -- Part IV Emerging Concepts -- Chapter 8  
Standardisation, Components and the Bespoke: New Design Challenges  
-- Introduction -- Standardising the Product: Modernism --  
Standardisation as an Architectural Solution -- Early 20th Century  
Modernism -- Standardised Modular Buildings: Implications on Design  
Value -- ISO and Standards for Modern Society -- Standardising  
the Process and Bespoking the Product: Contemporary Approaches --  
Design Process Through Digital Design Workflows -- The ISO 19650  
Standardising Process -- Implications on Architectural Profession and  
BIM Washing -- Customised Building Components -- Implications  
on Design Value -- Impact on Sociocultural Design Value -- Impact  
on the Democratic Design Value -- Impact on the Environmental Design  
Value -- Impact on the Economic Design Value -- Conclusion --  
References -- Chapter 9 Data, Information or Design: New Ways of  
Conceiving the Value of Architecture in the Global, Digital Age --  
Introduction -- Computer-aided Design - Harbinger of the Digital-  
Human Workforce -- Instructive or Questioning Communication --  
Hybridity -- Conclusion -- References -- Part V Managing Digital  
Projects -- Chapter 10 The Architect's Guide to Running a Digital Job  
-- Introduction.  
Virtual Master Builders: Embracing Digital Transformation in Modern

Architecture -- Data-driven Design and the Architect's Role in Building Information Modelling -- A Global Approach and Local Issues -- Conclusion -- References -- Chapter 11 How Digital Projects are Changing Contracts -- Introduction -- Digital Projects and Contracts -- How Digital Projects Are Transforming Contracts -- Pathways Towards Integrated Digital Practice -- Conclusion -- References -- Chapter 12 Roles and Responsibilities in the Digital Design Team -- Context -- Evolving Roles and Team Balance -- Change Agents -- Facilitated Collaboration -- Ways Forward -- References -- Chapter 13 The Language of Digital Technologies -- Introduction -- BIM, a Sign Abounding with Signifieds and Signifiers -- From PAS 1192 to ISO 19650: A History of Findings, Promises and Language -- ISO 19650 and the Collaborative Production of Information -- BIM Execution Plan -- Common Data Environment -- Experience of Countries Adaptation to Digital Construction -- Conclusion -- References -- Part VI Final Thoughts -- Chapter 14 Conclusion -- Technologies -- The Human Context of Digital Work -- Emerging Concepts -- Managing Digital Projects -- References -- Index -- EULA.

---

### Sommario/riassunto

"Architectural and Construction Design and Management in the Digital Age will deliver a critical appraisal of digitisation in the evolving processes of construction design and management. It will provide a holistic treatment of the subject in terms of technologies, human context, emerging concepts, and the management of digital projects. The human context is a particularly novel perspective, with issues such as working in a virtual environment, creativity in the digital world, the diversity of people involved in construction, and using technology to reach the disadvantaged and disenfranchised, explored fully. The book examines digital techniques and their most appropriate application, while also discussing where analogue methods may still have a place. With a strong international perspective, it will enable readers to understand the power and potential impact of digitisation in construction."--
