Sommario/riassunto

This book takes a cross-disciplinary and cross-cultural look at mass appraisal expertise for property valuation in different market conditions, and offers some cutting- edge approaches. The editors establish an international platform and present the scientific debate as well as practical feasibility considerations. Heretic and orthodox valuation methods are assessed based on specific criteria, partly technical and partly institutional. Methodological evaluation is approached using two types of criteria: operational concerns about how to determine property value differentials between spa
