

1. Record Nr.	UNINA9911020059503321
Autore	Shah Maulin P
Titolo	Application of Sewage Sludge in Industrial Wastewater Treatment
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2024 ©2024
ISBN	9781119857396 1119857392 9781119857389 1119857384
Edizione	[1st ed.]
Descrizione fisica	1 online resource (136 pages)
Disciplina	628.3
Soggetti	Sewage sludge Land treatment of wastewater
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Application of Sewage Sludge in Industrial Wastewater Treatment -- Contents -- 1 Sludge Conditioning, Activation, and Engineering -- 1.1 Introduction -- 1.2 Conditioning -- 1.2.1 Conditioning of Sewage Sludge by Increasing the Rate of Hydrolysis -- 1.2.1.1 Mechanical Pretreatment -- 1.2.1.2 Thermal Hydrolysis -- 1.2.1.3 Chemical Pretreatment -- 1.2.2 Conditioning for Sludge Dewatering -- 1.2.2.1 Physical Conditioning -- 1.2.2.2 Chemical Conditioning -- 1.3 Activation of Sewage Sludge -- 1.3.1 Adsorbents Produced by Thermal Carbonization -- 1.3.2 Adsorbents by Physical Activation -- 1.3.3 Adsorbents after Chemical Activation -- 1.3.4 Surface Chemistry of the Sewage Sludge-Based Adsorbent -- 1.4 Conclusion -- References -- 2 Emerging Issues and Their Solutions Related to the Use of Sewage Sludge in Waste Treatment -- 2.1 Introduction -- 2.2 Sewage Characteristics -- 2.3 Emerging Issues in Sewage Sludge Treatment -- 2.4 Sludge Treatment Process -- 2.4.1 Pre-treatment -- 2.4.2 Thermal Treatment Process -- 2.4.2.1 Incineration -- 2.4.2.2 Gasification -- 2.4.2.3 Pyrolysis -- 2.4.2.4 Supercritical Water Gasification and Hydrothermal Carbonization -- 6.6.1.4 Textile Industry -- 6.6.1.5 Polyester Industry -- 6.6.1.6

Pharmaceutical Industry -- 6.6.1.7 Olive Oil Industry -- 6.6.1.8 Fertilizer Industry -- 2.5 Sustainable Future Prospective for Thermal Treatment of Stabilization of Sewage Sludge -- References -- 3 A Detailed Overview of Anaerobic Digestion of Sewage Sludge with Different Process Intensification Strategies -- 3.1 Introduction -- 3.2 Anaerobic Digestion of Sewage Sludge -- 3.3 Factors Affecting Sludge Digestion -- 3.4 Bioreactors for Sludge Digestion -- 3.4.1 Different Anaerobic Bioreactor Configurations -- 3.4.2 Membrane Bioreactor for Sewage Sludge Digestion -- 3.4.3 Pilot-scale Anaerobic Digestion. 3.4.4 Full-scale Anaerobic Digestion of Sewage Sludge -- 3.5 Process Improvement Strategies -- 3.5.1 Sludge Pretreatment -- 3.5.1.1 Physical and Mechanical Treatment -- 3.5.1.2 Chemical Treatment -- 3.5.1.3 Thermal Treatment -- 3.5.1.4 Biological Treatment -- 3.5.2 Effect of Additives -- 3.6 Conclusion and Future Research Direction -- References -- 4 Potential of Treated Industrial Effluent - Challenges and Opportunities -- 4.1 Introduction -- 4.2 Physio-chemical Characteristics of Industrial Water -- 4.2.1 Characteristics of Industrial Influent and Effluent -- 4.2.2 Quality of Treated Water -- 4.3 Potential Reuse of Treated Effluent -- 4.3.1 End Use of Wastewater -- 4.3.2 Standards -- 4.3.3 Benefits Involved -- 4.4 Challenges -- 4.4.1 Technical Aspects -- 4.4.2 Economic Aspects -- 4.4.3 Social Aspects -- 4.4.4 Risk Factor -- 4.4.5 Policy Frameworks -- 4.4.6 Possible Solutions -- 4.5 Future Scope -- 4.6 Conclusion -- References -- 5 Biological and Microbiological Characteristics of Activated Sewage Sludge -- 5.1 Introduction -- 5.2 Biological Properties of Activated Sludge -- 5.3 Microbial Community Structure of Activated Sludge -- 5.4 Seasonal Variation of Microbiological Characteristic of Activated Sludge -- 5.5 Physiological Function and Enzyme Activity of Microbiome in Activated Sludge -- 5.6 Antibiotic Resistant Gene in Activated Sludge -- 5.7 Conclusion -- References -- 6 Pre-treatment of Industrial Wastewater -- 6.1 Introduction -- 6.1.1 Background -- 6.2 Importance of Key Industrial Sectors -- 6.3 Need for Pre-treatment of Industrial Effluents -- 6.3.1 Pre-treatment Processes -- 6.3.2 Sustainability Approach -- 6.4 Classification of Pre-treatment Technologies -- 6.4.1 Classical Technologies -- 6.4.2 Hybrid Methods -- 6.4.3 Categorization of Techniques -- 6.4.3.1 Thermal Pre-treatments -- 6.4.3.2 Mechanical Pre-treatments. 6.4.3.3 Chemical Pre-treatments -- 6.4.3.4 Biological Pre-treatments -- 6.4.3.5 Special Pre-treatments -- 6.5 Characteristics of Different Pre-treatment Technologies -- 6.5.1 Biodegradability -- 6.5.2 Dewaterability -- 6.5.3 Renewable Energy Production -- 6.5.3.1 Biogas Production -- 6.5.3.2 Bio-hydrogen Production -- 6.5.3.3 Bio-ethanol Production -- 6.5.3.4 Bio-diesel Production -- 6.6 Pre-treatment of Types of Industrial Waste -- 6.6.1 Major Industries and their Pre-treatment Technologies -- 6.6.1.1 Petrochemical Industry -- 6.6.1.2 Paper and Pulp Industry -- 6.6.1.3 Coal Manufacturing Industry -- 6.6.2 Cost Analysis -- 6.7 Future Prospects -- 6.8 Conclusion -- References -- Index -- EULA.

Sommario/riassunto

This book, edited by Maulin P. Shah, delves into the application of sewage sludge in the treatment of industrial wastewater. It explores various methods and strategies for conditioning, activating, and engineering sewage sludge to optimize its use in industrial contexts. The book addresses emerging issues, process strategies like anaerobic digestion, and potential reuse of treated effluent. It also evaluates biological properties and pre-treatment technologies for industrial wastewater. The content is aimed at environmental scientists, engineers, and professionals in wastewater management, providing insights into sustainable waste treatment practices and the challenges

associated with sewage sludge management.
