1. Record Nr. UNINA9911020087903321

Autore	Anand Abhineet
Titolo	Simulation Techniques of Digital Twin in Real-Time Applications : Design Modeling and Implementation
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2024 ©2024
ISBN	9781394257003 1394257007 9781394256990 139425699X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (372 pages)
Altri autori (Persone)	SardanaAnita KumarAbhishek MohapatraSrikanta Kumar GuptaShikha
Disciplina	003/.3
Soggetti	Digital twins (Computer simulation)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Series Page -- Title Page -- Copyright Page -- Dedication -- Contents -- Preface -- Part 1: A Guide to Simulated Techniques in Digital Twin -- Chapter 1 Introduction to Different Simulation Techniques of Digital Twin Development -- 1.1 Introduction -- 1.2 Literature Review -- 1.3 Digital Twin Simulation Techniques -- 1.3.1 Finite Element Analysis Simulation -- 1.3.2 Computational Fluid Dynamics Simulation -- 1.3.3 Discrete Event Simulation -- 1.3.4 Agent-Based Modeling Simulation -- 1.3.5 Multi-Body Dynamics Simulation -- 1.3.6 Monte Carlo Simulation -- 1.4 Conclusion -- References -- Chapter 2 Comprehensive Analysis of Error Rate and Channel Capacity of Fisher Snedecor Composite Fading Model -- 2.1 Introduction -- 2.2 Fisher Snedecor Composite Fading -- 2.3 Mathematical Analysis -- 2.3.1 Error Rate Analysis -- 2.3.1.1 NCBFSK and BDPSK -- 2.3.1.2 BPSK, BFSK, and QPSK -- 2.3.1.3 MQAM -- 2.3.1.4 MPSK -- 2.3.1.5 MDPSK -- 2.3.1.6 NCMFSK -- 2.3.1.7 DQPSK -- 2.3.2 Channel Capacity Analysis -- 2.3.2.1 ORA -- 2.3.2.2 OPRA --

Literature Review -- 8.3.1 Classification of MBD Simulations -- 8.3.2 Finite Element Analysis -- 8.4 Proposed Work -- 8.5 Conclusion -- References -- Chapter 9 MGF-Based BER and Channel Capacity Analysis of Fisher Snedecor Composite Fading Model -- 9.1 Introduction -- 9.2 Fisher Snedecor Composite Fading Model -- 9.3 Performance Analysis Using MGF -- 9.3.1 ABER -- 9.3.1.1 BDPSK and NBFSK -- 9.3.1.2 BPSK and BFSK -- 9.3.1.3 MAM -- 9.3.1.4 Square MQAM -- 9.3.1.5 MPSK -- 9.3.2 NMFSK -- 9.3.3 Adaptive Channel Capacity -- 9.3.3.1 ORA -- 9.3.3.2 CIFR -- 9.4 Numerical Results -- 9.5 Conclusion -- References. Chapter 10 Precision Agriculture: An Augmented Datasets and CNN Model-Based Approach to Diagnose Diseases in Fruits and Vegetable Crops -- 10.1 Introduction -- 10.2 Literature Review -- 10.3 Major Fruit Diseases in the Valley -- 10.4 Methodology -- 10.5 Results and Discussion -- 10.6 Extended Experiment -- 10.7 Concluding Remarks -- References -- Chapter 11 A Simulation-Based Study of a Digital Twin Model of the Air Purifier System in Chandigarh Using LabVIEW -- 11.1 Introduction -- 11.1.1 Background Information on Chandigarh's Air Pollution Problem -- 11.1.2 Digital Twin Technology and Its Relevance to Air Quality Monitoring -- 11.2 Literature Review -- 11.3 Methodology -- 11.4 Results -- 11.5 Discussion -- 11.6 Conclusion -- References -- Chapter 12 Use of Digital Twin in Predicting the Life of Aircraft Main Bearing -- 12.1 Introduction -- 12.1.1 Background -- 12.1.2 Importance of Predictive Maintenance -- 12.1.3 Challenges in Aircraft Main Bearing Life Prediction -- 12.1.4 Digital Twin Technology in Aviation -- 12.2 Fundamentals of Digital Twin Technology -- 12.2.1 Components of a Digital Twin -- 12.2.2 Enabling Technologies for Digital Twin -- 12.3 Benefits of Digital Twin Technology -- 12.3.1 Aircraft Main Bearings: Structure and Failure Modes -- 12.4 Developing a Digital Twin for Aircraft Main Bearings -- 12.5 Predictive Analytics for Main Bearing Life Prediction -- 12.5.1 Machine Learning Algorithms for Predictive Modeling -- 12.5.2 Challenges of Digital Twin for Aircraft Health -- 12.5.3 Security Threats of the Digital Twin in Aircraft Virtualization -- 12.6 Future Prospects and Conclusion of Digital Twin for Aircraft Health -- References -- Chapter 13 Power Energy System Consumption Analysis in Urban Railway by Digital Twin Method -- 13.1 Introduction -- 13.2 Literature Review -- 13.3 Method -- 13.4 Implementation -- 13.5 Conclusion.
References -- Chapter 14 Based on Digital Twin Technology, an Early Warning System and Strategy for Predicting Urban Waterlogging -- 14.1 Introduction -- 14.1.1 Definition -- 14.1.2 Application Areas of Digital Twin Technology -- 14.2 Literature Review -- 14.3 Methodology -- 14.4 Discussion and Conclusion -- References -- Chapter 15 Advanced Real-Time Simulation Framework for the Physical Interaction Dynamics of Production Lines Leveraging Digital Twin Paradigms -- 15.1 Introduction -- 15.2 Introduction to Advanced Simulation Frameworks -- 15.2.1 The Evolution of Production Line Simulations -- 15.2.2 The Promise of Real-Time Analysis -- 15.3 Digital Twins: A Comprehensive Analysis -- 15.3.1 What Defines a Digital Twin? -- 15.3.2 The Architecture and Components of Digital Twins -- 15.3.3 Advantages of Integrating Digital Twins in Manufacturing -- 15.4 Physical Interaction Dynamics in Production Lines -- 15.4.1 The Nature of Physical Interactions -- 15.4.2 The Role of Dynamics in Production Efficiency -- 15.4.3 Challenges in Traditional Simulation Methods -- 15.5 Building the Advanced Real-Time Simulation Framework -- 15.5.1 Core Principles and Design Objectives -- 15.5.2 Data Integration and Processing -- 15.5.2.1 Role of Sensors and IoT -- 15.5.2.2 Algorithmic Foundations for Feedback -- 15.6 Types of Algorithms -- 15.6.1 Pseudocode for Real-Time Adjustments -- 15.6.1.1 Initialization --

Sommario/riassunto

SIMULATION TECHNIQUES OF DIGITAL TWIN IN REAL-TIME APPLICATIONS The book gives a complete overview of implementing digital twin technology in real-time scenarios while emphasizing how this technology can be embedded with running technologies to solve all other issues. Divided into two parts with Part 1 focusing on simulated techniques in digital twin technology and Part 2 on real-time applications of digital twin technology, the book collects a significant number of important research articles from domain-specific experts. The book sheds light on the various techniques of digital twin technology that are implemented in various application areas. It emphasizes error findings and respective solutions before the actual event happens. Most of the features in the book are on the implementation of strategies in real-time applications. Various real-life experiences are taken to show the proper implementation of simulation technologies. The book shows how engineers of any technology can input their research ideas to convert to real scenarios by using replicas. Hence, the book has a collection of research articles from various engineers with expertise in different technologies from many regions of the world. It shows how to implement the embedded real-time data into technologies. Specifically, the chapters relate to the auto landing and cruising features in aerial vehicles, automated coal mining simulation strategy, the enhancement of workshop equipment, and implementation in power energy management for urban railways. This book also describes the coherent mechanism of digital twin technologies with deep neural networks and artificial intelligence. Audience Researchers, engineers, and students in computer science, software engineering and industrial engineering, will find this book to be very useful.
