

1. Record Nr.	UNINA9911020098603321
Autore	Fung Wing Kam
Titolo	Statistical DNA forensics : theory, methods and computation / / Wing Kam Fung and Yue-Qing Hu
Pubbl/distr/stampa	Chichester, England ; ; Hoboken, NJ, : John Wiley & Sons, c2008
ISBN	9786611321956 9781281321954 1281321958 9780470727041 0470727047 9780470727034 0470727039
Descrizione fisica	1 online resource (265 p.)
Collana	Statistics in practice
Altri autori (Persone)	HuYue-Qing
Disciplina	614/.1
Soggetti	Forensic genetics - Statistical methods Forensic genetics - Data processing Forensic genetics - Computer programs
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [229]-236) and index.
Nota di contenuto	Introduction -- Probability and statistics -- Population genetics -- Parentage testing -- Testing for kinship -- Interpreting mixtures -- Interpreting mixtures in the presence of relatives -- Other issues.
Sommario/riassunto	Statistical methodology plays a key role in ensuring that DNA evidence is collected, interpreted, analyzed and presented correctly. With the recent advances in computer technology, this methodology is more complex than ever before. There are a growing number of books in the area but none are devoted to the computational analysis of evidence. This book presents the methodology of statistical DNA forensics with an emphasis on the use of computational techniques to analyze and interpret forensic evidence.
