

1. Record Nr.	UNINA9911020138403321
Titolo	Proceedings of the 46th Conference on Glass Problems : a collection of papers presented at the 46th Conference on Glass Problems, November 12-13, 1985, University of Illinois at Urbana-Champaign, Illini Union Building, Urbana, IL / / Clifton G. Bergeron, editor ; sponsored by the Departments of Ceramic Engineering, University of Illinois at Urbana-Champaign and Ohio State University
Pubbl/distr/stampa	Columbus, Ohio, : American Ceramic Society, 1986
ISBN	9786612313684 9781282313682 1282313681 9780470320327 047032032X 9780470320679 0470320672
Descrizione fisica	1 online resource (238 p.)
Collana	Ceramic engineering and science proceedings, , 0196-6219 ; ; v. 7, no. 3-4
Altri autori (Persone)	BergeronClifton G
Disciplina	666.1
Soggetti	Glass manufacture Glass
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	46th Conference on Glass Problems; Table of Contents; Applications of Modeling and Process Analysis to Furnace Operations and Redesign; Insulation of Suspended Walls; Improvement of Glass Furnace Efficiency by Reduction of Regenerator Infiltration; Measurements of Convective Heat Transfer Coefficient in Different Checker Systems; Gases in Glass; Use of Fining Agents; Sonic Energy As a Means to Reduce Energy Consumption During Glass Melting; Development and Use of Mechanical Stirring in Corning Glass Works Laboratory Simulative Testing of Checker Bricks Leading to Economic and Efficient RegeneratorsLubricious and Protective Coatings for Glass Containers; Batch Blanket Chemistry and Air Quality Emissions

Associated with Cold-Top Electric Furnaces; Glass Furnace Insulation-A New Material; Present Status of Instrumentation Systems for Container Forehearth; The Fluidized Bed Glass Batch Preheater; OSHA-EPA Regulations-Effect on Glass Furnace Repairs; Application of the Ceramic Welding Process to the Maintenance and the Repair of Glass Furnaces

A Novel Technique for Characterizing the Performance of a ForehearthLow Cost Pressure Swing Adsorption (PSA) Oxygen Systems for Oxygen Enrichment of Glass Furnaces

Sommario/riassunto

This volume is part of the Ceramic Engineering and Science Proceeding (CESP) series. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.
