

1. Record Nr.	UNINA9911020151303321
Autore	Verna Emeline <1988->
Titolo	Asymptomatic Osseous Variations of the Postcranial Human Skeleton
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2023 ©2023
ISBN	9781394229543 1394229542 9781394229529 1394229526
Descrizione fisica	1 online resource (198 pages)
Soggetti	Skeleton Human anatomy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- Foreword -- Preface -- Acknowledgments -- Introduction -- Chapter 1. The Upper Limb -- 1.1. Clavicle -- 1.1.1. Perforation of the clavicle -- 1.1.2. Coracoclavicular joint -- 1.1.3. Duplication of the acromial extremity -- 1.1.4. Costoclavicular sulcus -- 1.2. Scapula -- 1.2.1. Coracoclavicular joint -- 1.2.2. Suprascapular foramen -- 1.2.3. Suprascapular notch -- 1.2.4. Unfused acromial epiphysis -- 1.2.5. Circumflex sulcus -- 1.2.6. Acromial articular facet -- 1.3. Humerus -- 1.3.1. Septal aperture -- 1.3.2. Supracondyloid process -- 1.3.3. Supracondyloid tunnel -- 1.3.4. Translucency of the septum -- 1.4. Radius -- 1.4.1. Radial tuberosity orientation -- 1.4.2. Double distal radial articular facet -- 1.5. Ulna -- 1.5.1. Medial trochlear notch -- 1.5.2. Lateral trochlear notch -- 1.5.3. Trochlear groove -- Chapter 2. The Thorax -- 2.1. Sternum -- 2.1.1. Sternal cleft -- 2.1.2. Non-fusion of sternabrae -- 2.1.3. Misplaced manubrium-mesosternal joint -- 2.1.4. Sternal foramen -- 2.1.5. Manubriosternal fusion -- 2.1.6. Manubrium foramen -- 2.1.7. Xiphoid foramen -- 2.1.8. Single xiphoid process -- 2.1.9. Bifurcated xiphoid process -- 2.1.10. Triple xiphoid process -- 2.1.11. Absence of the xiphoid process -- 2.1.12.

Suprasternal bones -- 2.2. Ribs -- 2.2.1. Cervical rib -- 2.2.2. Lumbar rib -- 2.2.3. Bifid rib -- 2.2.4. Costal fusion -- 2.2.5. Sacral rib -- 2.2.6. Intrathoracic rib -- 2.2.7. Absence of the 12th rib -- Chapter 3. The Vertebral Column -- 3.1. First cervical vertebra (atlas) -- 3.1.1. Posterior atlas bridge -- 3.1.2. Lateral atlas bridge -- 3.1.3. Retroarticular bridge -- 3.1.4. Occipitalization -- 3.1.5. Anterior atlas arch deficiency -- 3.1.6. Posterior atlas arch deficiency -- 3.1.7. Double condylar facet -- 3.1.8. Spina bifida occulta -- 3.2. Second cervical vertebra (axis). 3.2.1. Os odontoideum -- 3.3. Cervical vertebra -- 3.3.1. Open transverse foramen -- 3.3.2. Double transverse foramen -- 3.3.3. Bifid spinous process -- 3.4. Spine -- 3.4.1. Spina bifida occulta -- 3.4.2. Butterfly vertebra -- 3.4.3. Spondylolysis -- 3.4.4. Transitional vertebra -- 3.4.5. Sacralization -- Chapter 4. The Pelvic Girdle -- 4.1. Sacrum -- 4.1.1. Lumbarization -- 4.1.2. Spina bifida occulta -- 4.1.3. Butterfly vertebra -- 4.1.4. Accessory hip facet -- 4.2. Coxal bone -- 4.2.1. Accessory hip facet -- 4.2.2. Pubic spine -- 4.2.3. Acetabular mark -- Chapter 5. The Lower Limb -- 5.1. Femur -- 5.1.1. Supracondylar apophysis -- 5.1.2. Fabella -- 5.1.3. Third trochanter -- 5.1.4. Hypotrochanteric fossa -- 5.1.5. Allen's fossa -- 5.1.6. Posterior cervical (acetabular) imprint -- 5.1.7. Poirier's facet -- 5.2. Patella -- 5.2.1. Dorsal defect -- 5.2.2. Bipartite patella -- 5.2.3. Vastus notch -- 5.3. Tibia -- 5.3.1. Lateral squatting facet -- 5.3.2. Medial squatting facet -- 5.4. Talus -- 5.4.1. Lateral squatting facet -- 5.4.2. Medial squatting facet -- 5.4.3. Os trigonum -- 5.4.4. Bifid inferior articular facet -- 5.5. Calcaneus -- 5.5.1. Calcaneus secundarius -- 5.5.2. Absence of the anterior articular surface of the talus -- 5.5.3. Bipartite anterior facet -- 5.5.4. Extension of the posterior articular facet -- 5.5.5. Peroneal trochlea -- 5.5.6. Retrotrochlear eminence -- 5.6. The foot -- 5.6.1. Os tibiale -- 5.6.2. Os peroneum -- Appendix. AOVs versus Pathologies -- References -- Index -- EULA.

Sommario/riassunto

This book, authored by Emeline Verna, delves into the asymptomatic osseous variations of the postcranial human skeleton. It provides a comprehensive examination of anatomical variations in bones beyond the skull, including the upper limb, thorax, and vertebral column. The text aims to enhance understanding of these natural variations, often unnoticed in clinical settings, and their implications for human anatomy and posture. It is intended for professionals and students in anatomy, anthropology, and related fields, offering detailed comparative analysis with animal anatomy to contextualize human skeletal adaptations.
