

1. Record Nr.	UNINA9911020164703321
Autore	Baker Richard W (Richard William), <1941->
Titolo	Membrane technology and applications / / Richard W. Baker
Pubbl/distr/stampa	Hoboken, NJ : , : Wiley, , 2024 ©2024
ISBN	9781119686026 9781119685999 9781119686002 1-119-68599-0 1-119-68600-8 1-119-68602-4
Edizione	[Fourth edition.]
Descrizione fisica	1 online resource (xiv, 539 pages) : illustrations (some color)
Soggetti	Membrane separation Membranes (Technology) Membranes (Tecnologia) Separació per membranes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"Membranes have gained an important place in chemical technology and are used in a broad range of applications. The key property that is exploited is the ability of a membrane to control the permeation rate of a chemical species through the membrane, e.g. in controlled drug delivery. In separation applications, the aim is to allow one component of a mixture to permeate the membrane freely, while hindering permeation of other components."--
