

1. Record Nr.	UNINA9911020185003321
Titolo	Proceedings of the 41st Conference on Glass Problems : a collection of papers presented at the 41st Conference on Glass Problems // sponsored by the Departments of Ceramic Engineering, Ohio State University and University of Illinois, November 18-19, 1980, Ohio State University, Fawcett Center for Tomorrow, Columbus, Ohio ; Charles H. Drummond III, conference director
Pubbl/distr/stampa	Columbus, Ohio, : American Ceramic Society, 1981, c1980
ISBN	9786612314025 9781282314023 1282314025 9780470291061 0470291060 9780470291474 0470291478
Descrizione fisica	1 online resource (152 p.)
Collana	Ceramic engineering and science proceedings ; ; v. 2, no. 1-2
Altri autori (Persone)	DrummondCharles H (Charles Henry)
Disciplina	628.5
Soggetti	Glass manufacture Glass
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographies.
Nota di contenuto	Proceedings of the 41st Conference on Glass Problems; Table of Contents; Design Considerations for All-Electric Glassmelts: 11; Forehearth Electric Heating Controlled by Conductance; Fuel Savings on Remodeled Lehrs; Asbestos Elimination in a Glass Plant; Problems Involving Spent-Chrome-Bearing Refractories; Chrome-Containing Basic Materials: Experience in the European Glass Industry.; Longer Glass Furnace Life Using 38.1-cm-Thick Flux Material; Glass Batch Pelletizing and Pollution Capture Studies in Pellet Beds; Fluidized Beds for Glass Batch Preheating An Energy Survey in the Glass IndustryEnvironmental Regulation and Its Effect on the Glass Industry; Surface Cord: A Case History; Surface Cord Analysis and Potential Sources; General Comments on Surface Cord;

Sommario/riassunto

This volume is part of the Ceramic Engineering and Science Proceeding (CESP) series. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.
