Record Nr. UNINA9911020223303321 **Titolo** Ciba Foundation symposium on ionizing radiations and cell metabolism // editors for the Ciba Foundation, G.E.W. Wolstenholme and Cecilia M. O'Connor London, : J. & A. Churchill Ltd., 1956 Pubbl/distr/stampa **ISBN** 9786613620736 9781280590900 1280590904 9780470719008 0470719001 9780470716465 0470716460 Descrizione fisica 1 online resource (334 p.) Novartis Foundation Symposia; ; v.888 Collana Altri autori (Persone) WolstenholmeG. E. W (Gordon Ethelbert Ward) O'ConnorCecilia M <1927-> (Cecilia Mary) 612.014482 Disciplina Soggetti Ionizing radiation - Physiological effect Cell metabolism Lingua di pubblicazione Inglese Materiale a stampa **Formato** Livello bibliografico Monografia "With 48 illustrations." Note generali Includes bibliographical references and indexes. Nota di bibliografia Nota di contenuto IONIZING RADIATIONS AND CELL METABOLISM: CONTENTS: Chairman's opening remarks; Cytoplasmic and nuclear structure in relation to

opening remarks; Cytoplasmic and nuclear structure in relation to metabolic; Discussion; The effects of ionizing radiations on enzymes in vitro; Discussion; The activity of enzymes and coenzymes in irradiated tissues; Discussion; Effects of X-rays and radiomimetic agents on nucleic acids and nucleoproteins; Discussion; Oxidative phosphorylation in some radiosensitive tissues after irradiation; Discussion; The effects of extraneous agents on cell metabolism; Discussion; The influence of oxygen on radiation effects; Discussion The influence of chemical pre- and post-treatments on radiosensitivity of bacteria, and their significance for higher organismsDiscussion; Postirradiation treatment of mice and rats; Discussion; Studies on the

mechanism of protein synthesis; Discussion; Nucleic acids and amino

acid incorporation; Discussion; Protein synthesis in protoplasts;

Discussion; Influence of radiation on DNA metabolism; Discussion; The influence of radiation on the metabolism of ascites tumour cells; Discussion; Influence of radiation on metabolism of regenerating rat liver; Discussion

The induction of chromosomal aberrations by ionizing radiation and chemical mutagens Discussion; Primary sites of energy deposition associated with radiobiological lesions; Discussion; Effects of radiation and peroxides on viral and bacterial functions linked to DNA specificity; Discussion; General Discussion; Chairman's closing remarks

## Sommario/riassunto

The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia, in which groups of leading scientists from a range of topics across biology, chemistry and medicine assembled to present papers and discuss results. The Novartis Foundation, originally known as the Ciba Foundation, is well known to scientists and clinicians around the world.
