1. Record Nr. UNINA9911020321003321

Titolo	A collection of papers presented at the 1994 Ceramic Manufacturers and Suppliers Workshop : September 25-28, 1994, Galt House Hotel, Louisville, KY / / Russell Wood, Proceedings Committee
Pubbl/distr/stampa	Westerville, OH, : American Ceramic Society, c1995
ISBN	9786612312984 9781282312982 1282312987 9780470314708 0470314702 9780470316337 0470316330
Descrizione fisica	1 online resource (316 p.)
Collana	Ceramic engineering & science proceedings, , 0196-6219 ; ; v. 16, no. 3
Altri autori (Persone)	WoodRussell
Disciplina	600
Soggetti	Ceramics Ceramic industries
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"May-June 1995."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Ceramic Engineering & science Proceedings; Table of Contents; Increased Production and Quality Achieved by Improved Firing Consistency; The Importance of Sample Integrity: A Commercial Lab's Perspective; Using Your PC for Reformulation; Ceramic Body Reformulation Procedure with Emphasis on Ball Clay; Glaze Defects in Sanitaryware Plants; Solving Firing Problems-Guessing or Facts?; Stormwater Management System; Various Ways of Approaching Surface Finishing from an Engineering Viewpoint; Kiln Furniture for the Sanitaryware, Electrical Porcelain, and Electronic Industries Development and Use of ASTM Test Methods for Ceramic RantsGlazing Defects and Their Control; Using ASTM Standards in the Tile Industry; Successfully Drying Sanitaryware: Important Considerations; Implementing Statistical Process Control; Eliminating Preheat and Cooling Cracks in Fast Firing Sanitaryware; Tape Casting and Roll

Compaction; NOx Reduction Techniques for the Ceramic Industry; Measurement of Hazardous Air Pollutants: Impact of the Clean Air Act on the Manufacturing Community; Application of Soil Mechanics to Ceramic processing; Sampling Procedures for Raw Materials
Establishing Regulatory Compliance in a New PlantProblem Solving Using Experimental Design Techniques; Ball Clay Selection Using Experimental Design Techniques; Using ASTM Slip Test Methods in Ceramic Tile Plants; Kiln Furniture for the Tableware and Brick Industries; Implementing Responsible Cares®; Linear Programming as a Method for Optimization of Ceramic Processes; Material Variables Involved in the Precision Process of Surface Finishing of Ceramic Products; Drying and Firing: Kiln Furniture; Monocottura and Monoporosa Tile Reformulation Principles and Practices
Using Failure Mode and Effects Analysis in New Glaze IntroductionSupplier Quality Management for Ceramic Industries; Evaluation of Fluoride Emissions Methods for Use at Ceramic Tile Kilns; Forming and Extrusion of Porcelain Bodies; Forming in the RAM Mode; Mystery of Air in Drying; Traveling Thermocouples Solve Firing Problems; Ball Clay Basics; Lo-Mass® Kiln Cars for the Ceramic Industry; Feldspar: What Is It? Where Does It Come From? What Do I Need to Know About Using It?; Silicon Carbide and Aluminum Oxide Kiln Furniture for the Ceramic Industry
Automated Baroid Filter Characterization of Casting Slip ComponentsThe Quality Improvement Movement: An Overview; Various Aspects of Glaze Preparation and Application Methods; Minimizing Color Adjustments to Production Glazes; Plastic Forming; The Function of Feldspar and/or Nepheline Syenite in a Ceramic Whiteware Body; Using ASTM Standards as the Basis for Whiteware Process Control Procedures; Analyzing Sanitaryware Tunnel Kiln Operations with Thaveling Thermocoupl; Raw Material Specifications; Polishing Parameters and Their Effect on Glass Polish Performance

Sommario/riassunto

This volume is part of the Ceramic Engineering and Science Proceeding (CESP) series. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.
