

1. Record Nr.	UNINA9911020343203321
Titolo	Methods of biochemical analysis . Volume 21 // edited by David Glick
Pubbl/distr/stampa	New York, : Wiley, 1973
ISBN	1-282-31337-1 9786612313370 0-470-11041-4 0-470-11083-X
Descrizione fisica	1 online resource (582 p.)
Collana	Methods of Biochemical Analysis ; ; v.21
Altri autori (Persone)	GlickDavid <1908->
Disciplina	543.8 574.1928505
Soggetti	Analytical chemistry Biochemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	METHODS OF BIOCHEMICAL ANALYSIS; CONTENTS; Techniques for the Characterization of UDP Glucuronyltransferase, Glucose-6-phosphatase, and Other Tightly-Bound Microsomal Enzymes; Determination of Selenium in Biological Materials; High-Performance Ion-Exchange Chromatography with Narrow-Bore Columns: Rapid Analysis of Nucleic Acid Constituents at the Subnanomole Level; Newer Developments in Enzymic Determination of D-Glucose and Its Anomers; Radiometric Methods of Enzyme Assay Polarography and Voltammetry of Nucleosides and Nucleotides and Their Parent Bases as an Analytical and Investigative ToolIntegrated Ion-Current (IIC) Technique of Quantitative Mass Spectrometric Analysis: Chemical and Biological Applications; Author Index; Subject Index; Cumulative Author Index; Cumulative Subject Index
Sommario/riassunto	Biochemical analysis is a rapidly expanding field and is a key component of modern drug discovery and research. Methods of Biochemical Analysis provides a periodic and authoritative review of the latest achievements in biochemical analysis. Founded in 1954 by Professor David Glick, Methods of Biochemical Analysis provides a timely review of the latest developments in the field.
