

1. Record Nr.	UNINA9911020439403321
Autore	Weiss Kenneth M
Titolo	Genetics and the logic of evolution
Pubbl/distr/stampa	[Place of publication not identified], : Wiley Liss, 2004
ISBN	1-280-55663-3 9786610556632 0-471-53266-5 0-471-53265-7
Edizione	[Reissue]
Descrizione fisica	1 online resource (538 pages)
Disciplina	572.838
Soggetti	Evolution, Molecular Genes Logic Evolution Biology Health & Biological Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	In this book the authors draw on what is known, largely from recent research, about the nature of genes and cells, the genetics of development and animal and plant body plans, intra- and interorganismal communication, sensation and perception, to propose that a few basic generalizations, along with the modified application of the classical evolutionary theory, can provide a broader theoretical understanding of genes, evolution, and the diverse and complex nature of living organisms.
