Record Nr. UNINA9911020471403321 Advances in enzymology and related areas of molecular biology. **Titolo** Volume 28 / / edited by F.F. Nord Pubbl/distr/stampa New York, : Wiley, 1966 **ISBN** 1-282-68216-4 9786612682162 0-470-12273-0 0-470-12351-6 Edizione [11th ed.] Descrizione fisica 1 online resource (556 p.) Collana Advances in enzymology and related areas of molecular biology;; 28 Altri autori (Persone) NordF. F Disciplina 574.192 612.0151 Soggetti Clinical enzymology **Enzymes** Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Description based upon print version of record. Nota di bibliografia Includes bibliographical references and index. Nota di contenuto ADVANCES IN ENZYMOLOGY AND RELATED SUBJECTS OF BIOCHEMISTRY; CONTENTS; Adsorption of Enzymes at Interfaces: Film Formation and the Effect on Activity; Allosteric Regulation of Enzyme Activity: Reconstitution of the Respiratory Chain: The Biochemistry and Function of B-Lactamase (Penicillinase); The Biochemistry of Laminarin and the Nature of Laminarinase; Die Bestimmung der biologischen Tatigkeit in Boden mit Enzymmethoden; Biosynthesis of Ribose and Deoxyribose; Author Index; Subject Index; Cumulative Indexes of Volumes 1-28 Sommario/riassunto Advances in Enzymology and Related Areas of Molecular Biology is a seminal series in the field of biochemistry, offering researchers access to authoritative reviews of the latest discoveries in all areas of enzymology and molecular biology. These landmark volumes date back to 1941, providing an unrivaled view of the historical development of enzymology. The series offers researchers the latest understanding of enzymes, their mechanisms, reactions and evolution, roles in complex biological process, and their application in both the laboratory and industry. Each volume in the series featu
