This book contains the proceedings of the 1st International Conference Sommario/riassunto on Artificial Intelligence, Computing Technologies, Internet of Things, and Data Analytics – AICTA 2023. The theme of the conference is "Artificial Intelligence and Its Applications." It focuses on recent trends and innovative approaches across various domains of Computer Engineering, such as cloud computing, image processing and computer vision, machine learning and deep learning, IoT, analytics, and security. The book introduces new ideas in artificial intelligence and its subfields, including machine learning and deep neural networks. This

volume will be valuable for researchers and practitioners in computer

engineering and related fields.
