

1. Record Nr.	UNINA9911021967203321
Autore	Mejia Jezreel
Titolo	New Challenges in Software Engineering : Volume 1 // edited by Jezreel Mejía, Mirna Muñoz, Alvaro Rocha, Francisco Javier Espinosa-Faller, Joel Antonio Trejo-Sanchez
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
ISBN	9783031903106 9783031903090
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (678 pages)
Collana	Studies in Computational Intelligence, , 1860-9503 ; ; 1209
Altri autori (Persone)	MuñozMirna RochaAlvaro Espinosa-FallerFrancisco Javier Trejo SanchezJoel Antonio
Disciplina	620.00285
Soggetti	Engineering - Data processing Software engineering Computational intelligence Artificial intelligence Data Engineering Software Engineering Computational Intelligence Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Trends in Software Engineering: A Bibliometric Study -- Faults Detection in Use Case Modeling Learning -- Measurement of information technology service quality for the Faster Payment Systems in Peru -- User-Centered Design for Creating Augmented Reality Stories for Primary Education -- Maintainability Measurement Framework in DevOps Settings: A Proposal -- Software testing: A tertiary survey of the literature.
Sommario/riassunto	This book explores the key challenges shaping the future of software development, including automation, AI-driven development, security-focused engineering, resilient and autonomous architectures, business

process optimization, cloud computing, microservices, high-performance distributed systems, and sustainable technologies. Software engineering is undergoing a constant transformation, driven by rapid technological advances and evolving market demands. Additionally, it delves into the ethical considerations of AI, the evolution of intuitive user interfaces, and the importance of multidisciplinary collaboration.
