Livello bibliografico	Monografia
Nota di contenuto	The Perils of Dialectic -- Variations on a Theme: Humanity and Progress -- Relatively Modest Horrors: Adorno and Animals -- The Politics of an Aesthetic Animal.
Sommario/riassunto	"Built upon the principle that divides and elevates humans above other animals, humanism is the cornerstone of a worldview that sanctifies inequality and threatens all animal life. Adorno, Politics, and the Aesthetic Animal analyses this state of affairs and suggests an alternative--a way for humanity to make itself into a new kind of animal. Theodor W. Adorno has been accused of leading critical theory into a blind alley, divorced from practical social and political concerns. In Adorno, Politics, and the Aesthetic Animal, Caleb J. Basnett argues that by placing the problem of the human/animal distinction at the centre of Adorno's thought, we discover a new Adorno, one whose critique of domination is in dialogue with classic concerns of political thought forged by Aristotle, including questions of humanist political education and the role of art. Through a close reading of primary sources, Basnett identifies the principal conceptual structure entwined with the understanding of human life as antagonistic to other animals,

and outlines how forms of aesthetic experience disrupt this problematic concept in favour of a reconceptualization of what we call human. His analysis displaces the centrality of the human and attempts to open up a space for its transformation, both in terms of how humans relate to each other and in how humans relate to other animals."--

Sommario/riassunto

Everything about ADHD in adolescents is here in one place. This book is for you: a clinician diagnosing and treating teens with ADHD, a teacher educating teens with ADHD, or a parent raising one. Written for all readers, this resource is both comprehensive and straightforward, with quick tips and concise guidance in each chapter. Now in its fully revised and expanded second edition, this text includes three distinct sections that explore essential aspects of ADHD in adolescents. The first section provides detailed yet accessible best-practices of diagnosis and treatment. The second section takes a deep dive into the many disorders that mimic and co-occur with ADHD. The final and third section focuses on critical topics related to adolescent ADHD: the all new chapter on Girls and ADHD, along with the hard to find chapters on Race, Culture, and Ethnicity in ADHD, as well as Relationships, Sexuality, and Sexual Behavior in Adolescents with ADHD. Across all three sections, clinical scenarios mirror common dilemmas faced by parents and teachers, and recurrent challenges familiar to clinicians. Information and resources direct the reader to best practices in ADHD in adolescents, with useful strategies usable for everyone. Written by experts in the field, ADHD in Adolescents, 2e is a valuable guide for all clinicians caring for teens with ADHD: pediatricians, child and adolescent neurologists, child and adolescent psychiatrists, adolescent medicine specialists, psychologists, nurse practitioners, physician assistants, social workers, and licensed clinical mental health workers. Parents and teachers of adolescents with ADHD will find this resource indispensable.
