Sommario/riassunto	This book casts an analytical eye on the legal dynamics of mediation premised on a multidisciplinary approach. This is the very first book to meld mediation and applied psychology with a view to portray the myriad of cognitive biases with which the great bulk of legal actors grapple/tussle with in mediation settings. The overriding goal of this book is to provide a multidisciplinary, comprehensive, and full-fledged framework to legal dynamics of mediation while emphasizing the paramount importance of incorporative mediation to protect the fundamental rights of the weakest disputant in the room—something that has not been done yet. This book is the very first one to provide a framework/frame of reference to the usage of artificial intelligence in the remit of both mediation settings and Restorative Relationship Session (RRS).
