Titolo	Approaching Natural Resources for Sustainable Development in Indonesia : Confronting the Socio-Ecological Crisis // edited by Henny Warsilah, Agus Heri Purnomo
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2025
ISBN	9789819669134 9789819669127
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (428 pages)
Collana	Sustainable Development Goals Series, , 2523-3092
Altri autori (Persone)	PurnomoAgus Heri
Disciplina	304.2
Soggetti	Human ecology Environmental sciences - Social aspects Anthropology Ethnology Sustainability Power resources Environmental economics Environmental Anthropology Environmental Social Sciences Sociocultural Anthropology Resource and Environmental Economics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part 1 Introduction -- Chapter 1 Problems of the Socio-Ecological Crisis in Indonesia from the Perspective of Sustainable Development -- Part 2 Natural Resource Governance from a Political, Policy and Legal Perspective -- Chapter 2 Environmental and Societal Challenges in Indonesia: An Evaluation of Laws, Policies and Natural Resources Governance -- Chapter 3 Natural Resources Governance from Perspective of Politics: The Indonesian's Case -- Chapter 4 Prospects and Trends in Natural Resource Governance: A Case Study of Tin Reclamation Land in East Belitung, Indonesia -- Chapter 5 Socio-Ecological Crisis of Abandoned Coal-Mining Pits in East Kalimantan:

Efforts to Fight Injustice.

Sommario/riassunto

This book brings to light the sustainability dilemma in Southeast Asia, with a sharp focus on Indonesia's rapid economic growth and its profound impact on natural resources, ecosystems, and society. It examines the complex challenge of fostering strong economic development while avoiding environmental degradation and social dislocation. Central to this discourse is the vital role of government regulation and the imperative of community involvement in managing natural resources. Indonesia's economic boom—mirroring trends across Asia—has triggered escalating land-use conflicts in forests, peatlands, rural-urban zones, and karst landscapes. This is paralleled by expanding access to coal, tin, and oil and gas, leading to large-scale extractive operations and widespread environmental damage. The book adopts a sustainable development framework, exploring its ecological, economic, social, and political dimensions. Crucially, it argues that today's socio-ecological crisis is not just a consequence of growth, but a systemic condition rooted in capitalism. Written by leading experts, the book offers interdisciplinary perspectives—socio-cultural, legal, political, and economic—supported by detailed case studies. A timely and essential resource for policymakers, researchers, and practitioners committed to Indonesia's sustainable future.
