

1. Record Nr.	UNINA9911022361303321
Autore	Abd-Elsalam Kamel A
Titolo	Green Chemistry Methods for Producing Biopolymeric Nanomaterials
Pubbl/distr/stampa	Singapore : , : Springer, , 2025 ©2025
ISBN	981-9695-01-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (737 pages)
Collana	Smart Nanomaterials Technology Series
Disciplina	572.33
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book is a thorough guide that navigates the convergence of environmentally friendly techniques and cutting-edge nanotechnology. This book tackles the growing demand for eco-friendly techniques for nanomaterial production, as tailored by academics, scientists, and experts in materials science, nanotechnology, and green chemistry.
