Livello bibliografico	Monografia
Note generali	Previously issued in print: 2018.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Violence, competition, and exchange in the early colonial era -- Knowledge, weakness, and narrative in the late eighteenth century -- Astronomy and U.S. expansion in the Lower Mississippi valley -- Allegiance, identities, and national scientific communities -- Ethnography and intelligence in the time of conquest -- Deep history, deep South : slavery and geology in the antebellum era -- Skulls, scalps, and Seminoles.
Sommario/riassunto	'Frontiers of Science' takes American scientific thought and discoveries away from the learned societies, museums, and teaching halls of the Northeast and puts the production of knowledge about the natural world in the context of competing empires and an expanding republic

in the Gulf South.
