

1. Record Nr.	UNINA9911026132103321
Autore	Bedrossian Edmond
Titolo	The Immediacy Concept : Treatment Planning from Analog to Digital
Pubbl/distr/stampa	Batavia : , : Quintessence Publishing Company, Incorporated, , 2022 ©2022
ISBN	9781647241193 1647241197 9781647241209 1647241200
Edizione	[1st ed.]
Descrizione fisica	1 online resource (411 pages)
Altri autori (Persone)	BedrossianE. Armand BrechtLawrence
Disciplina	617.6/93
Soggetti	Dental Implantation Dental Implants Digital Technology Osseointegration Case Reports
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	THE IMMEDIACY CONCEPT: Treatment Planning from Analog to Digital -- Frontmatter -- Library of Congress Cataloging-in-Publication Data -- Contents -- Foreword -- Preface -- Contributors -- SECTION I: THE IMMEDIACY CONCEPT -- Chapter 1: Osseointegration Demystified -- Tooth-Supporting Tissues -- Wound Healing Cascade and Bone Healing Mechanism -- The Event of Osseointegration -- Different Patterns of Bone Healing Around Implants -- Implants Placed in a Healed Site -- Immediate Implant Placement -- Implant Macro Design and Surface: Impact on Early Bone Healing -- Changes in Implant Anchorage During the Early Healing Phase -- Conclusions -- References -- Chapter 2: Biologic Principles and the Immediacy Concept -- Osseointegration: Primary and Secondary Stability -- Biologic Principles -- Principles of Immediacy -- References -- Chapter 3: Implant Design for the Immediacy Concept -- The Effects of Implant Design on

Osseointegration -- Implant Design Characteristics -- Primary Stability
 -- Prosthetic Considerations -- References -- Chapter 4:
 Biomechanical Principles for Immediate Loading -- Site Preparation:
 Undersizing the Osteotomy -- Bone Density, IT, and ISQ Value --
 Influence of Implant Geometry -- Implant Surface Enhancement --
 Conclusion -- References -- Chapter 5: The Tissue-Level Implant --
 The Gold Standard -- Peri-Implant Soft Tissue Topography -- One-
 Piece Implant: The TLX -- Clinical Applications -- Conclusion --
 References -- SECTION II: THE DIGITAL WORKFLOW -- Chapter 6:
 Digital Workflow and the Immediacy Concept -- Advantages of 3D
 Scanning and Guided Surgery -- Managing the Small Edentulous Site --
 Surgical Guide Designs and Manufacturing -- References -- Chapter 7:
 Digital Workflow Step by Step -- Acquiring Data -- Superimposition of
 DICOM and STL -- Digital Workflow Summary.
 Digital Workflow Utilizing SIAB for Complete-Arch Implant Therapy --
 Conclusion -- References -- Chapter 8: Complete Digital Workflow for
 Full-Arch Rehabilitation -- Components of Digital Workflow --
 Challenges Encountered in Complete Digital Workflow -- Complete
 Digital Workflow in Edentulous Arches -- Discussion -- Conclusion --
 References -- Chapter 9: Analog to Digital Workflow in Immediacy --
 Influence of Medical Conditions and Medications on Osseointegration
 -- Factors Influencing Osseointegration -- The Immediacy Concept
 with Analog and Digital Workflows -- Conclusion -- References --
 SECTION III: TREATING FULLY EDENTULOUS ARCHES -- Chapter 10:
 Loading Protocols for Full-Arch Rehabilitation -- History and Evolution
 -- Technical Aspects of Immediacy -- Number of Implants -- Digital
 Workflow -- Case Example -- Conclusions -- References -- Chapter
 11: Systematic Treatment Planning Protocol for the Maxilla -- Presence
 or Absence of a Composite Defect -- The Transition Line: Visibility of
 the Residual Ridge Crest -- Radiographic Evaluation: Zones of the
 Maxilla -- Application of Bedrossian Screening -- References --
 Chapter 12: The Tilted Implant Concept in the Maxilla -- Challenges
 with Edentulous Arches -- Prosthetic and Surgical Evaluation --
 Number and Distribution of Implants -- Consequence of Prosthetic
 Cantilevers -- Achieving Initial Stability -- Challenges and
 Complications -- Long-Term Maintenance Protocol -- Conclusion --
 References -- Chapter 13: Systematic Treatment Planning Protocol for
 the Mandible -- Effects of Edentulism on Patients -- Treatment
 Alternatives -- Prosthetic Design: Begin with the End in Mind --
 Interarch Space Requirements -- Biomechanical Considerations:
 Number and Distribution of Implants -- Radiographic Evaluation --
 Digital Planning Software -- Conclusion -- References.
 SECTION IV: PROSTHETICS FOR FULL-ARCH REHABILITATION -- Chapter
 14: Chairside Analog Conversion for a Fixed Provisional Prosthesis --
 Using BLX Implants and Screw-Retained Abutments -- Registration of
 the SRA Position -- Seating the Prosthesis with Temporary Cylinders --
 Finishing the Prosthesis -- References -- Chapter 15: Workflow and
 Material Choice for the Full-Arch Prosthesis -- Material Properties --
 Framework Passivity -- Cast Noble Alloy Framework for a Metal-Acrylic
 Prosthesis -- Milled Titanium Framework for a Metal-Acrylic Prosthesis
 -- Milled Monolithic Zirconia Prosthesis -- Maintenance Protocols for
 the Full-Arch Implant Prosthesis -- References -- Chapter 16:
 Managing Structural Complications of Full-Arch Restorations --
 Management of Complications for the Conversion Prostheses --
 Delamination of the Denture Tooth of a Fixed Hybrid -- Chipping of
 Overlying Ceramics -- Fracturing of Zirconia Framework -- Patient
 Education on Complication Risk -- References -- SECTION V:
 ZYGOMATIC IMPLANTS -- Chapter 17: Biomechanical Principles for

Zygomatic Implants -- The Zygomatic Implant Under Function --
Zygomatic Implant Trajectory -- Zones of the Maxilla -- ZAGA
Classification -- Patient Selection -- Preoperative Considerations --
Surgical Protocol for ZAGA 0 to 3 with Round Zygomatic Implants --
Surgical Protocol for ZAGA 4 with Flat Zygomatic Implants -- Prosthetic
Conversion Technique -- Postoperative Care -- Final Prosthetic
Reconstruction -- Discussion -- References -- Chapter 18: New
Zygomatic Implant Design -- Thread Design and Pitch -- Surface
Enhancement -- Apical Geometry -- Implant Diameter -- A 55-Degree
Platform, SRA, and Prosthetic Versatility -- Modifications to the Middle
Portion of the Implant -- Two Different Designs -- Zygomatic Screw-
Retained Abutments -- References.
Chapter 19: Prevention and Management of Zygomatic Implant
Complications -- Orbital Involvement -- Intracranial Placement --
Infraorbital Nerve Paresthesia -- Subperiosteal Infections --
Overextension of the Zygomatic Implant Apex -- Encountering Other
Implants in the Zygoma -- Vestibular Dehiscence -- Failed Zygomatic
Implant -- Fractured Implant -- Sinus Infections -- Conclusion --
References -- SECTION VI: CASE PRESENTATIONS -- Chapter 20: Case
Presentations -- Single Implant in the Esthetic Zone -- Two Adjacent
Implants in the Esthetic Zone -- Immediate Mandibular Molar Implant
-- Immediate Maxillary Molar Implant -- Partially Edentulous Cases --
Full-Arch Tilted Concept -- Zygomatic Implants -- Quad-Zygoma
Concept -- References -- Index -- Join our mailing list! -- Backcover.

Sommario/riassunto

"Clinical manual for immediate implant treatment planning in the
digital age, including the fundamentals of analog treatment planning
that clinicians must master before moving to the digital realm"--
