   Sommario/riassunto "AI tools have powered our phones, our cars, our news, and countless
                     other aspects of our lives for years now. Still, the emergence of Large
                     Language Models (LLMs) feels, to many of us in education, as the most
                     dramatic disruption we've experienced yet. And yet, with these
                     challenges comes great opportunities to strengthen our teaching and
                     simplify the many other tasks we're responsible for in our professional
                     lives as faculty members. In this book, four educators with decades of
                     teaching experience provide concrete, applicable ideas for utilizing
                     LLMs and other AI tools to add creativity to our courses and lessen the
                     toll of administrative tasks. Whether you teach literature or physics or
                     anything in between, this collection of tips and assignments will
                     provide you with practical ideas you can use today."--Back cover.
