

1. Record Nr.	UNINA9911028753303321
Autore	Garcia-Cardona Cristina
Titolo	Advances in Data Science : Women in Data Science and Mathematics (WiSDM) 2023
Pubbl/distr/stampa	Cham : , : Springer, , 2025 ©2025
ISBN	3-031-87804-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (539 pages)
Collana	Association for Women in Mathematics Series ; ; v.37
Altri autori (Persone)	LeeHarlin
Disciplina	004.0151
Soggetti	Intel·ligència artificial Teoria de grafs Reconeixement de formes (Informàtica) Enginyeria de programari Dades massives Teoria de la informació Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This volume features recent advances in data science ranging from algebraic geometry used for existence and uniqueness proofs of low rank approximations for tensor data, to category theory used for natural language processing applications, to approximation and optimization frameworks developed for convergence and robustness guarantees for deep.
