

1. Record Nr.	UNINA9911019679903321
Titolo	Interactions Between Macro- and Microorganisms in Marine Sediments
Pubbl/distr/stampa	[Place of publication not identified], : American Geophysical Union, 2005
ISBN	1-118-66544-9
Descrizione fisica	1 online resource (viii, 390 pages) : illustrations
Collana	Coastal and estuarine studies ; ; 60
Disciplina	577.77
Soggetti	Marine sediments - Microbiology Biogeochemical cycles
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Published by the American Geophysical Union as part of the Coastal and Estuarine Studies, Volume 60. Interactions between macroorganisms (benthic fauna and macrophytes) and the biogeochemistry and microbiology of aquatic sediments have proved essential for the functioning of most benthic marine ecosystems. While our knowledge of the biogeochemical consequences of macrobiological activity has grown considerably during the last two decades, the feedback mechanisms and physicochemical forces controlling the abundance and diversity of benthic animals and plants still elude definitive analysis. In order to clarify the state of the science and provide a framework for future research, we present in this volume a synthesis of latest developments in research on interactions between animals, plants, and microorganisms in marine sedimentary environments (including intertidal areas, continental shelves, deep-sea sediments, and cold seeps). Of particular importance are the new experimental (field studies, laboratory experiments) and theoretical (modeling) approaches, which we also discuss.

Autore	Bernardi Gabriella
Titolo	Le Sorelle Dimenticate : Pioniere Della Scienza e Dell'astronomia Prima Di Carolina Herschel
Pubbl/distr/stampa	Cham : , : Springer International Publishing AG, , 2025 ©2025
ISBN	3-031-98547-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (218 pages)
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Ispirato alle principali astronome menzionate nella poesia di Siv Cedering "Letter from Caroline Herschel" alle sue "sorelle perdute da tempo, dimenticate nei libri che registrano la nostra scienza", questo libro racconta la vita di venticinque scienziate, con un focus particolare su astronome e matematiche.
