Nota di contenuto	Student satisfaction with the use of Malaysian sign language learning mobile applications -- Survey on Non-Invasive Glucose Monitoring and Glycemia Detection using Machine Learning and Signal Analysis Techniques -- UAV image motion deblurring methods in precision agriculture: A Bibliometric Analysis to A Short Survey -- Simulation of Distributed Sensing Applications: Tradeoff between Accuracy and Simulation Time -- A Deep Learning Approach for Proactive Detection and Mitigation of Zero-Day Attacks in IoT Environment -- Classification algorithms to predict the risk of fetal death in Ecuador -- From gas

sensors to efficient electronic nose systems: A bibliometric analysis to short survey -- Replica Placement Strategy (RPS) for Effective Network Usage in Cloud Environment -- Investigating Behavioral Responses across Landslide Scenarios in Virtual Reality -- Artificial Intelligence Tools for Condition Monitoring of Mechanical Processes Security implementations during the development of enterprise mobile applications: lessons learnt -- Technology Adoption for Advancing Learning Quality Performance: Insights into Technology-Assisted Instructional Design.

Sommario/riassunto

This book gathers selected high-quality research papers presented at the Tenth International Congress on Information and Communication Technology (ICICT 2025), held in London, on February 18–21, 2025. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of Things (IoT), and e-mining. Written by respected experts and researchers working on ICT, the book offers an asset for young researchers involved in advanced studies. The book is presented in ten volumes.
