

1. Record Nr.	UNINA9911034936203321
Autore	Peppoloni Silvia
Titolo	Geoethics and Geosciences Serving Society : Reflections from the 37th International Geological Congress // by Silvia Peppoloni, Giuseppe Di Capua
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
ISBN	9783032037541 9783032037534
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (167 pages)
Collana	SpringerBriefs in Geoethics, , 2662-6799
Altri autori (Persone)	Di CapuaG (Giuseppe)
Disciplina	500
Soggetti	Earth sciences Geography Earth and Environmental Sciences Earth Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book explores diverse perspectives and practices in geoethics, offering a comprehensive overview of how ethical considerations are being integrated into the geosciences across disciplines and regions. It draws from the session “Geoethics at the Heart of All Geoscience: Serving the Public Good” held at the 37th International Geological Congress (IGC) in Busan, Republic of Korea. At the core of the discussion is geoethics - an integrated ethical framework for the geosciences. It provides geoscientists with guidance for responsible action in the face of complex global and societal challenges. By embracing their individual and collective responsibilities, geoscientists can play a key role in advancing human well-being and promoting the public good, while reshaping humanity’s relationship with the Earth system. Contributors to this volume share insights and expertise, outline methodologies and strategies, raise critical questions, propose best practices, and present case studies that address the ethical, social, and cultural dimensions of geoscience. This diversity ensures a pluralistic, interdisciplinary approach that fosters dialogue and

collaboration. Chapters are structured to build a coherent narrative, moving from foundational geoethical concepts to a wide range of applications, and culminating in the theme of diplomacy. Intended for a broad audience - including geoscientists, scholars across disciplines, humanists, social scientists, students, professionals, policymakers, journalists, and engaged citizens - this book invites reflection and action at the intersection of science, ethics, and society.
