Nota di contenuto	Chapter 1: Introduction -- Chapter 2: Literature Review -- Chapter 3: Analytical Framework -- Chapter 4: Methodology -- Chapter 5: Constructing Legal Reasoning: A Particulate Realization -- Chapter 6: Constructing Legal Reasoning: A Periodic Realization -- Chapter 7: Constructing Legal Reasoning: A Prosodic Realization -- Chapter 8: Conclusion.
Sommario/riassunto	This book presents a fine-grained and dynamic description of the discursive construction of legal reasoning in judicial opinions, drawing upon the Systemic Functional linguistic perspective of language and genre. It aims to explore the discursive resources in constructing legal reasoning across metafunctions, at different levels, and of various sizes. This book contributes to the linguistic understanding of legal reasoning in judicial opinions and extends genre studies to large texts with complex and hierarchical structures. It presents an applicable model for a deep analysis of relations between legal reasoning and language. The findings of this research may also provide subject-specific knowledge for common law students in case reading and

Howard, Yu-Chu Shen -- How do initial signals of quality influence the diffusion of new medical products? : the case of new cancer drug treatments / Rena M. Conti, Arielle Bernstein, David O. Meltzer -- Technology diffusion and substitution of medical innovations / Victoria Serra-Sastre, Alistair McGuire -- Health insurance and hospital technology adoption / Seth Freedman.

Sommario/riassunto

Medical technology broadly defined to include all aspects of the process of treating disease (e.g., pharmaceuticals, medical devices, and surgical procedures) is profoundly important for individual health and, consequently, also for general welfare. Advances in medical technology convey the prospect of both improved population health and increased general welfare. However, because of the extensive regulation of the markets for healthcare goods and services, the development and application of medical technologies differs fundamentally from non-medical technological advances. In this volume of the *Advances in Health Economics and Health Services Research* series we present several papers that provide theoretical and empirical evidence about the market for medical technology.
